## Topic 11: Represent and Interpret Data on Line Plots

### Lesson 11-1: Read Line Plots

**Essential Question:** How can you read data in a line plot?

**Objective:** Students will be able to read and interpret data using line plots

**Look Back and This Lesson:** In Grade 2, you recorded measurement data in line plots with whole number units. In Grade 3, you recorded similar data in line plots marked with half and quarter inches. In Grade 3, you also located fractions on a number line, including fractions greater than one. In Grade 4 Topic 9, you learned about mixed numbers. Today we will begin to extend our previous understanding to read line plots with fractional units.

#### CCSS.MATH.CONTENT.

**4.MD.B.4** Make a line plot to display a data set of measurements in fractions of a unit ( $\frac{1}{2}$ ,  $\frac{1}{4}$ ,  $\frac{3}{4}$ ). Use operations on fractions for this grade to solve problems involving information presented in line plots.

#### Vocabulary

Line plot, scale

#### Solve and Share

- To introduce the skill, as a whole class, engage in **Problem Set** page 4.
- Have students read the problem and solve to find the length of the longest fish caught and the length of the shortest fish caught. Have students remember to be precise when answering questions and use appropriate labels.
- Have students explain how they solved.

#### Model: Visual Learning Edge

Teacher says out loud and "think" out loud the steps being taken to solve the problem.

- Teacher reads problem aloud.
- Teacher models using the examples provided while thinking aloud and explaining, how you can read data in a line plot. Teacher models and explains how line plots make data easier to read.

#### Convince Me!

Have students write and solve an equation to find how many miles Mr. Walker walked his dog at all for the seven days.

#### Guided Practice

- Guide students in the activity.
- Have students solve problems by using line plots.
- Have students explain how they solved.

#### Independent Practice

- Students will work independently to read and interpret data using line plots.

#### Differentiation

##### Intervention

1. **Line Plot Vocabulary** Sort students match key terms (line plot, data, tally, frequency) with visuals and definitions to strengthen vocabulary understanding.
2. **Guided Reading of Line Plots** students work with the teacher to read line plots together, answering simple questions such as "How many in all?" or "How many more?"
3. **Dot-by-Dot Practice** students complete partially filled line plots by placing the correct number of dots based on given data, then answer one-step questions.
4. **Intervention Activity in Workbook: "Reading Line Plots"**

##### Enrichment

1. **Create Your Own Line Plot** students survey classmates or use classroom objects to collect data and create a complete line plot, then write and solve questions about their data.
2. **Line Plot Mystery Challenge** students are given a completed line plot and must write a story or real-world situation that the data could represent.
3. **Math Talk Prompt Cards** students use cards with prompts like "What do you notice about this plot?" or "What patterns do you see?" to encourage deeper discussion about line plot features.
