## Chapter 13: Stress and Health

### ★ *Definition of stressors, stress, chronic stress, perceived control and examples*

- **Stressors:** specific events or chronic pressures that place demands on a person or threaten the person's well-being
  - Can be good, but also out of bad things
  - The "thing" (ex: exams, getting a job, where you're going to live)
  - Isn't going to give the same stress to everyone
- **Stress:** the physical and psychological response to internal or external stressors
  - The reaction to the "thing"
  - How you handle stressors, how you deal with
  - People react differently to different stressors, everyone interprets differently
- **Chronic stressors:** sources of stress that occur continuously or repeatedly
  - Health problems, bad relationships, etc.
  - Effects can accumulate and be long-lasting.
  - Chronic stressors have been shown to be linked to environments through environmental psychology.
- **Perceived controls**
  - Stressors challenge you to do something about it – having lack of control over the situation can add to the stress.
  - Studies show that perceived control over stressful events can be related to more effective coping
