Watkinson,William Theophilus Davison,1897 *The Meat Crisis* Joyce D'Silva,John Webster,2017-08-23 Meat and dairy
production and consumption are in crisis Globally 70 billion farm animals are used for food production every year It is well
accepted that livestock production is a major contributor to greenhouse gas emissions The Food and Agriculture
Organization of the United Nations FAO predicts a rough doubling of meat and milk consumption in the first half of the 21st
century with particularly rapid growth occurring in the developing economies of Asia What will this mean for the health and
wellbeing of those animals of the people who consume ever larger quantities of animal products and for the health of the
planet itself The new edition of this powerful and challenging book explores the impacts of the global growth in the
production and consumption of meat and dairy including cultural and health factors and the implications of the likely
intensification of farming for both small scale producers and for animals Several chapters explore the related environmental
issues from resource use of water cereals and soya to the impact of livestock production on global warming and issues
concerning biodiversity land use and the impacts of different farming systems on the environment A final group of chapters
addresses ethical and policy implications for the future of food and livestock production and consumption Since the first
edition published in 2010 all chapters have been updated three original chapters re written and six new chapters added with
additional coverage of dietary effects of milk and meat antibiotics in animal production and the economic political and ethical
dimensions of meat consumption The overall message is clearly that we must eat less meat to help secure a more sustainable
and equitable world **Applied Mechanics Reviews** ,1972 *Essential Primary Care* Andrew Blythe,Jessica
Buchan,2016-03-17 *Essential Primary Care* aims to provide undergraduate students with a comprehensive overview of the
