Candlestick charts are an effective way of visualizing price movements and due to the increased interest in the complex derivatives market they are being used more and more widely. A combination of a line chart and a bar chart where each bar represents the range of price movement over a given time interval, candlestick charts are most often used in technical analysis of equity and currency price patterns. Candlestick charts are formed with the help of the opening, high, low, and closing price of the day. Contains alphabetical explanations of over 200 candlestick and related terms. Includes daily charts of 50 companies and six month charts for comparative explanations of candlesticks with Western style technical indicators. Written by Michael C.
