Stories from Another Universe Johann Kassim,2017-10-30 The stories in this book originate from another reality called The Autherens Come and explore this world starting with A Story of Missed Opportunities This special tale takes place in Melswith and tells of the love between a lecturer and his student Follow their love story that brings you along to other places and beyond The twist at the end allows you to decide how it ends Reader participation is encouraged in Johann Kassim's writings so be prepared The Autherens is filled with stories emanating from all different genres One quirk about the author's books is that there is always a cavalcade of other interesting things within In this book readers don't need to decide on one main story You can skip about and enjoy the tales from many angles Instead of starting at the beginning read a short story in the middle or read a poem and then come back to the main story when the mood strikes This is one time when reader's choice is given priority over author's authority There is romance fantasy and transformational verse There has never been a book quite like Stories from Another Universe Don't wait any longer come explore this new universe Changing the Way We Manage Change Ronald R. Sims,2002-06-30 To cope with the chaotic new business environment organizations must find ways to manage the problems of change but also the process of change itself Yesterday's solutions are obsolete Innovative solutions are rare yet even the best require not only the efforts of individuals but other agents as well Sims sees change agents throughout any organization and at all levels line and staff people human resource specialists and those who have hitherto had little reason to tackle such tasks and have not been accountable for their outcomes Unique models are presented for change interventions along with techniques and tools that executives need to accomplish them The result is a book that experienced executives will understand and utilize but also one that will bring novices up to speed providing new ways to use their own instincts and capabilities for innovation Sims and his contributors challenge the traditional prescription for creating change providing a compelling critique of accepted approaches to change management highlighting the strengths of these approaches and emphasizing what can be extracted to foster change Each author provides insights into the competencies skills and values required for the rapid and successful creation of lasting change In doing so they also reemphasize that there is no universal approach to change management and that the need for innovation flexibility and adaptability remains dominant *Valley of Shadows* Lois Chisholm,2009-10-30 Cassie despised rudeness Every new job brought challenges She discovered the parents often needed more training than the children The nanny wanted no sympathy

for her scars Her aunt and a three legged cat had taught her to love She simply wanted people to respect others She had a way to get their attention Madam wishes to speak with you Melvin said in his stiff way Cassie brought the child down the front stairs She passed through the elaborate dining room and entered the kitchen She left the upstairs maid to watch Joey Yes Madam She stood close to the pompous woman I see the uniforms fit nicely We do prefer starch but we can overlook that However that hairthat hair You must do something with it The uncaring attitude was more than Cassie could take She reached to the crown of her head yanking the wig upward In a flash it was extended at the end of the nannys long arm Herewhat shall I do with it She went to care for the child while the butler and maid revived Madam
