Glassman, Deonne Zell, Shari Duron, 2014-12-18 An emergent approach to organizational strategy making assumptions that few organizations actually realize the goal of deliberative top down strategic planning and that effective strategy making occurs on a continual basis and is a shared activity of the entire organization This innovative book provides the first in depth look at how real organizations are formulating and implementing strategic change under this new paradigm The authors have dug deep into three large and varied organizations Hewlett Packard the California State University system and the County of Los Angeles and identified each one s efforts to develop a new strategic planning process better suited to match the current pace of change and environmental unpredictability The book is filled with vignettes quotes and real world examples that illustrate the trend toward faster more adaptive strategic planning processes It is relevant for a wide range of business governmental and non profit settings and should be required reading in any course on strategic planning **Navigating Through Turbulent Times** Tom Anderes, 2015-06-30 Readers and leaders interested in planning and leadership in higher education will receive two primary benefits from the book Navigating Through Turbulent Times First a strategic decision making model that they can apply with their leadership teams in universities systems and Boards Second they will be exposed to real life experiences from turbulent or unstable environments that they will likely confront during their careers The six components of the strategic decision making model are laid out in detail and used as the focus for recognizing and resolving issues that contribute to instability The integration of the model with the actual experiences provides leaders and their support teams with a comprehensive tool to address current and future challenges The model components include 1 an organizational mentality committed to strategic thinking 2 a maximum amount of historical data and information for analysis to inform decision makers 3 highly globalized scans of the future integrated with other decision making information 4 ongoing strategic planning processes 5 transparency to incorporate all key constituencies in planning and 6 a planning and assessment framework that allows leaders to weigh and filter information into thoughtfully constructed strategic alternatives and action plans The success of the model is based on the integration of all components with strategic thinking permeating

all aspects of decision making Ultimately leaders and leaders in waiting will be able to better anticipate and resolve problems through the use of the six major interactive components of the model Problems as reflected through the experiences that create instability such as dramatic funding reductions unanticipated leadership successions rapidly increasing student costs limited communications with constituencies limited planning and strategic thinking etc can be considered from the outset of thoughtful strategic planning and thinking exercises and not simply fixed after alternative strategies are in place

Big Wars and Small Wars Hew Strachan,2006-09-27 This is a fascinating new insight into the British army and its evolution through both large and small scale conflicts To prepare for future wars armies derive lessons from past wars However some armies are defeated because they learnt the wrong lessons fighting new conflicts in ways appropriate to the last For the British Army in the twentieth century the challenge has been particularly great It has never had the luxury of emerging from one major European war with the time to prepare itself for the next The leading military historians show how ongoing commitments to a range of small wars have always been part of the Army s experience After 1902 and after 1918 they included colonial campaigns but they also developed into what we would now call counter insurgency operations and these became the norm between 1945 and 1969 During the height of the Cold War in 1982 the Army was deployed to the Falklands Since 1990 the dominant tasks of the Army have been peace support operations This is an excellent resource for all students and scholars of military history politics and international relations and British history
