Straw Dogs Thoughts On Humans And Other Animals:

Straw Dogs John Gray, 2016-03-29 The British bestseller *Straw Dogs* is an exciting radical work of philosophy which sets out to challenge our most cherished assumptions about what it means to be human From Plato to Christianity from the Enlightenment to Nietzsche and Marx the Western tradition has been based on arrogant and erroneous beliefs about human beings and their place in the world Philosophies such as liberalism and Marxism think of humankind as a species whose destiny is to transcend natural limits and conquer the Earth John Gray argues that this belief in human difference is a dangerous illusion and explores how the world and human life look once humanism has been finally abandoned The result is an exhilarating sometimes disturbing book that leads the reader to question our deepest held beliefs Will Self in the *New Statesman* called *Straw Dogs* his book of the year I read it once I read it twice and took notes I thought it that good Nothing will get you thinking as much as this brilliant book Sunday Telegraph *Creaturely Theology* David Clough, 2013-02-11 *Creaturely Theology* is a ground breaking scholarly collection of essays that maps out the agenda for the future study of the theology of the non human and the post human A wide range of first rate contributors show that theological reflection on non human animals and related issues are an important though hitherto neglected part of the agenda of Christian theology and related disciplines The book offers a genuine interdisciplinary conversation between theologians philosophers and scientists and will be a standard text on the theology of non human animals for years to come Contributors include Esther D Reed Exeter Rachel Muers Leeds Stephen Clark Liverpool Neil Messer Lampeter Peter Scott Manchester Michael Northcott Edinburgh Christopher Southgate Exeter **Loss and the Other in the Visionary Work of Anna Maria Ortese** Vilma DeGasperi, 2014-03 Combines theme and genre analysis in a study of the Italian author from her first literary writings in the 1930s to her novels in the 1990s *Theory of World Security* Ken Booth, 2007-12-20 What is real What can we know How might we act This book sets out to answer these fundamental philosophical questions in a radical and original theory of security for our times Arguing that the concept of security in world politics has long been imprisoned by conservative thinking Ken Booth explores security as a precious instrumental value which gives individuals and groups the opportunity to pursue the invention of humanity rather than live determined and diminished lives Booth suggests that human society globally is facing a set of converging historical crises He looks to critical social theory and radical international theory to develop a comprehensive framework for understanding the historical challenges facing global business as usual and for planning to reconstruct a more cosmopolitan future *Theory of World Security* is a challenge both to well established ways of thinking about security and alternative approaches within critical security studies **Taboo**, 2005 **Affective Communities** Leela Gandhi, 2006-01-11 Investigates friendships between anti colonial Indians and anti imperial westerners in late 19th and early 20th centuries claiming that such inter cultural collaborations need to be added to annals of non violent historiography **Animal Lives Matter** Raymond Wacks, 2024-02-13 *Animal Lives Matter* provides a comprehensive

analysis of the legal philosophical and ethical aspects of animal rights It argues that the subject extends beyond the matter of our obligations towards animals to include our wider responsibilities for protecting the environment Drawing on numerous moral political legal religious and philosophical theories including utilitarianism deontology rights theory social contractarianism and the capabilities approach the author meticulously examines the questions of sentience speciesism personhood and human exceptionalism Lucid nuanced and academically rigorous this important book will be an essential resource for scholars of law politics philosophy ethics as well as policy makers and the general reader **The Earth Is Our Home** Nelson Rivera,2016-11-14 This book demonstrates that Mary Midgley s philosophy of evolution points the way towards considering the earth as our only true home since we are products of this planet and its evolving and complex life along with every other organism From the knowledge of ourselves as knowing animals with a biological as well as a cultural history Midgley proposes the elaboration of an evolutionary epistemology that situates us firmly on the earth together with other creatures while at the same time helping us to build knowledge of the world from the complexity of the human experience I like to call this approach by a known theological analogy a view from below that is from the underside of the world from the realms of nature and history Such an approach does not begin by assuming conceptions of design or order in nature a view that we term from above although it does not rule out the possibility of teleological or metaphysical constructions of reality in the long run This down to earth approach I consider essential for any philosophy or theology that wants to take evolutionary theory seriously while committed to a proper and non dismissive assessment of religious views

A Short History of Secularism Graeme Smith,2007-11-28 What does it mean to call Western society secular What is secularism And how should we understand the concept of secularism in international relations particularly the clash between radical Islam and the West The Latin term from which the word secular is derived saeculum means generation or age and came to mean that which belongs to this life to the here and now in this world It is widely used as a shorthand for the ideology which shapes contemporary society without reference to the divine However according to Graeme Smith secularism represents a great deal more He offers a radical reappraisal of the notion of secularism and its history beginning with the Greeks and proceeding to modernity and the contemporary period The assumption that the West is becoming increasingly secular is often unquestioned By contrast Dr Smith discerns a different kind of society one informed by a historical legacy which makes sense only when it is appreciated that it is religious Secularism was born of Christianity Daringly and very originally Smith argues that it is impossible to understand the idea of the secular without appreciating that at root it is Christian *A Short History of Secularism* will fundamentally reshape discussions of western culture religion and politics It will have strong appeal to students of religion political philosophy and the history of ideas **Beyond Liberalism** Michael K. Briand,2019-06-14 This book shows how the United States can begin dealing with the most difficult and intractable political issues that afflict liberal democracy today by initiating an inclusive public practice of ethical dialogue and deliberation

Beyond Liberalism argues that there is a flaw in liberalism the doctrine of individualism Specifically the defect consists in two distinct ideas atomism and subjectivism These ideas underpin the principle of freedom which is our default method for making personal choices and resolving interpersonal disagreements but contains no standard for determining what might be worth doing and hence no criteria for assigning relative priority to values in conflict Objective ethical judgments can be achieved however if we understand that insofar as they support the fulfillment of empirically identified human needs statements about good and bad are propositions of a factual nature A conception of the good for human beings is implicit in the fulfillment of those needs To articulate that conception we need a constructive productive public practice of ethical dialogue and deliberation To build such a practice will require what amounts to a life of ethical heroism This book seeks to encourage that sort of life

Born to Wonder Alister McGrath,2020-08-04 In Born to Wonder Alister McGrath a prolific Oxford scholar scientist and theologian explores the deepest mystery at the heart of life itself Life is a gift We never asked to be born Yet here we are living in this strange world of space and time trying to work out what it s all about before the darkness closes in and extinguishes us We are adrift on a misty grey sea of ignorance seeking a sun kissed island of certainty on which we might hope to find clear answers to our deepest and most poignant questions What is the point of life Why are we here And what is it about us that makes us want to ask these questions As far as we know we re the only species on earth that asks these questions and dares to hope that we might find an answer It seems that we are born to wonder not merely to exist From time to time all of us find ourselves overwhelmed by a sense of awe or mystery often when confronted with the beauty of nature whether it is a mountain stream or the vast expanse of ocean waters That is when we see a flicker of a grander vision of reality perhaps lying beyond the horizons of our experience It is as if for only a moment a veil is removed and we catch a half glimpsed sight of a promised land waiting to be mapped and explored This sense of wonder fuels much of humanity s creativity and its search for understanding

The Conspiracy against the Human Race Thomas Ligotti,2018-10-02 In Thomas Ligotti s first nonfiction outing an examination of the meaning or meaninglessness of life through an insightful unsparing argument that proves the greatest horrors are not the products of our imagination but instead are found in reality There is a signature motif discernible in both works of philosophical pessimism and supernatural horror It may be stated thus Behind the scenes of life lurks something pernicious that makes a nightmare of our world His fiction is known to be some of the most terrifying in the genre of supernatural horror but Thomas Ligotti s first nonfiction book may be even scarier Drawing on philosophy literature neuroscience and other fields of study Ligotti takes the penetrating lens of his imagination and turns it on his audience causing them to grapple with the brutal reality that they are living a meaningless nightmare and anyone who feels otherwise is simply acting out an optimistic fallacy At once a guidebook to pessimistic thought and a relentless critique of humanity s employment of self deception to cope with the pervasive suffering of their existence The Conspiracy against the Human Race may just convince readers that there is more than a

measure of truth in the despairing yet unexpectedly liberating negativity that is widely considered a hallmark of Ligotti's work

Thinking of Questions Peter Limm, 2015-09-23 This is not a conventional book. It is designed to stimulate and challenge all people who are curious to find out about the world they inhabit and their place within it. It does this by suggesting questions and lines of questioning on a wide range of topics. The book does not provide answers or model arguments but prompts people to create their own questions and a reading log or journal. To this end, almost all questions have a list of books or articles to provide a starter for stimulating further reading. Once you start, you will be hooked. Never stop questioning.

Metaphysics Adrian Pabst, 2012-05-04 This book does nothing less than to set new standards in combining philosophical with political theology. Pabst's argument about rationality has the potential to change debates in philosophy, politics, and religion from the foreword. This comprehensive and detailed study of individuation reveals the theological nature of metaphysics. Adrian Pabst argues that ancient and modern conceptions of being or individual substance fail to account for the ontological relations that bind beings to each other and to God, their source. On the basis of a genealogical account of rival theories of creation and individuation from Plato to postmodernism, Pabst proposes that the Christian Neo-Platonic fusion of biblical revelation with Greco-Roman philosophy fulfills and surpasses all other ontologies and conceptions of individuality.

Finish the Mission John Piper, David Mathis, 2012-09-30 This is no ordinary missions book. The theme isn't new, but the approach is refreshing and compelling, as contributors David Platt, Louie Giglio, Michael Ramsden, Ed Stetzer, Michael Oh, David Mathis, and John Piper take up the mantle of the Great Commission and its Spirit-powered completion. From astronomy to exegesis, from apologetics to the Global South, from being missional at home to employing our resources in the global cause, *Finish the Mission* aims to breathe fresh missionary fire into a new generation as together we seek to reach the unreached and engage the unengaged.

Post-Communist Malaise Zoran Samardzija, 2020-05-15 *Post-Communist Malaise* examines political modernism within the context of post-communist Eastern Europe and the Balkans. It focuses on how select cinemas from the regions critique European unification and how they represent related issues like the transition from communism to free market capitalism, the Euro crisis and austerity, and the rise of nationalism and right-wing politics.

The Radical Luhmann Hans-Georg Moeller, 2011-11-08 In *The Radical Luhmann*, Moeller focuses on Luhmann's paradigm shift from philosophy to theory, which introduced new perspectives on the contemporary world. Boldly breaking with the heritage of Western thought, Luhmann denied the central role of humans in social theory, particularly the possibility of autonomous agency. In this way, after Copernicus's cosmological and Darwin's biological, and Freud's psychological deconstructions of anthropocentrism, he added a sociological fourth insult to human vanity. A theoretical shift toward complex system-environment relations helped Luhmann accidentally solve one of Western philosophy's primary problems: mind-body dualism. By pulling communication into the mix, Luhmann finally rendered the Platonic dualist heritage obsolete. Moeller's clear presentation opens these formulations to a wide audience and directly
