Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. Patty climbs a tree. While sitting on a branch, she drops a leaf and an acorn at the same time. What would happen?
2. Patty decides to try another experiment. From the same branch, she drops a large, heavy rock and a small pebble. What would happen this time?

What will happen is that the acorn will touch the ground first due to having more mass and a small surface area causing it to have less air friction.

What is going to happen is that both are going to touch the ground at the same time due to both having low air friction, or the absence of air resistance.
