The Civic World of Early Renaissance Florence Gene A.

Brucker, 2015-03-08 Professor Brucker contends that changes in the social order provide the key to understanding the transition of Florence from a medieval to a Renaissance city. In this book he shows how Florentine politics were transformed from corporate to elitist. He bases his work on a thorough examination of archival material providing a full socio political history that extends our knowledge of the Renaissance city state and its development. The author describes the restructuring of the political system showing first how the corporate entities that comprised the traditional social order had lost cohesiveness after the Black Death. He traces the process of readjustment that began during the guild regime of 1378-1382 and analyzes the impact of foreign affairs. During the crisis years of the Visconti wars the distinctive features emerged of an elitist regime whose vitality was demonstrated following the death of Giangaleazzo Visconti and whose membership and style the author discusses in detail.
