 division multiple access TDMA for VANETs The performance of VeMAC is evaluated via mathematical analysis and computer
 simulations in comparison with other existing MAC protocols including the IEEE 802.11p standard This brief aims at
 proposing TDMA as a suitable MAC scheme for VANETs which can support the quality of service requirements of high
 priority VANET applications Transport Simulation Edward Chung,2019-05-07 In recent years the transport simulation of
 large road networks has become far more rapid and detailed and many exciting developments in this field have emerged
 Within this volume the authors describe the simulation of automobile pedestrian and rail traffic coupled to new applications
 such as the embedding of traffic simulation into driving simulators to give a more realistic environment of driver behavior
 surrounding the subject vehicle New approaches to traffic simulation are described including the hybrid mesoscopic
 microscopic model and floor field agent based simulation Written by an invited panel of experts this book addresses students
 engineers and scholars as well as anyone who needs a state of the art overview of transport simulation today **Dynamic
 Fleet Management** Vasileios S. Zeimpekis,Christos D. Tarantilis,George M. Giaglis,Ioannis E. Minis,2007-10-05 Dynamic
 Fleet Management will focus on real time management of a distribution system This means that when a dynamic event
 occurs within the distribution chain action must be taken in real time The book will integrate the latest results in system
 design algorithm development and system implementation to capture the state of the art research and application trends
 While much of the research in this area of transportation problems have almost exclusively concentrated on carrying out
 static plans on optional distribution conditions this book will examine those problems when some dynamic or unplanned even
 occurs within the transport or network system It will focus specifically on these cases and integrate the latest results in
 systems routing algorithms and case studies where information a dynamic event is revealed to the decision maker in a real
 time manner **Control Strategies for Advanced Driver Assistance Systems and Autonomous Driving Functions**
