Vision and Meaning in Ninth-Century Byzantium Leslie Brubaker, 1999-02-25 The Byzantines used imagery to communicate a wide range of issues In the context of Iconoclasm the debate about the legitimacy of religious art conducted between c AD 730 and 843 Byzantine authors themselves claimed that visual images could express certain ideas better than words Vision and Meaning in Ninth Century Byzantium deals with how such visual communication worked and examines the types of messages that pictures could convey in the aftermath of Iconoclasm Its focus is on a deluxe manuscript commissioned around 880 a copy of the fourth century sermons of the Cappadocian church father Gregory of Nazianzus which presented to the Emperor Basil I founder of the Macedonian dynasty by one of the greatest scholars Byzantium ever produced the patriarch Photios The manuscript was lavishly decorated with gilded initials elaborate headpieces and a full page miniature before each of Gregory's sermons Forty six of these including over 200 distinct scenes survive Fewer than half however were directly inspired by the homily that they accompany Instead most function as commentaries on the ninth century court and carefully deconstructed both provide us with information not available from preserved written sources and perhaps more important show us how visual images communicate differently from words

The Pentateuch as Narrative John H. Sailhamer, 2017-03-21 Most scholars studying the first five books of the Bible either attempt to dissect it into various pre-pentateuchal documents or at the very least analyze Genesis Exodus Leviticus Numbers and Deuteronomy as separate self-contained documents *The Pentateuch As Narrative* focuses on the narrative and literary continuity of the Pentateuch as a whole It seeks to disclose how the original Jewish readers may have viewed this multivolume work of Moses Its central thesis is that the Pentateuch was written from the perspective of one who had lived under the Law of the Covenant established at Mount Sinai and had seen its failure to produce genuine trust in the Lord God of Israel In this context the Pentateuch pointed the reader forward to the hope of the New Covenant based on divine faithfulness Throughout the commentary Dr Sailhamer pays close attention to and interacts with a wide range of classical and contemporary literature on the Pentateuch written by Jews Catholics and Protestants

Storytelling in Christian Art from Giotto to Donatello Jules Lubbock, 2006-01-01 Recounting the biblical stories through visual images was the most prestigious form of commission for a Renaissance artist In this book Jules Lubbock examines some of the most famous of these pictorial narratives by artists of the caliber of Giovanni Pisano Duccio Giotto Ghiberti Brunelleschi Donatello and Masaccio He explains how these artists portrayed the major biblical events such as the Sacrifice of Isaac the Annunciation the Feast of Herod and the Trial and Passion of Jesus so as to be easily

recognizable and at the same time to capture our attention and imagination for long enough to enable us to search for deeper meanings He provides evidence showing that the Church favoured the production of images that lent themselves to being read and interpreted in this way and he describes the works themselves to demonstrate how the pleasurable activity of deciphering these meanings can work in practice This book is richly illustrated and many of its photographs have been specially taken to show how the paintings and relief sculptures appear in the settings for which they were originally designed Seen from these viewpoints they become more readily intelligible Likewise the starting point and the originality of Lubbock's interpretations lies in his accepting that these works of art were primarily designed to help people to reflect upon the ethical and religious significance of the biblical stories The early Renaissance artists developed their highly innovative techniques to further these objectives not as ends in themselves Thus the book aims to appeal to students scholars and the general public who are interested in Renaissance art and to those with a religious interest in biblical imagery

Visual Perception Nicholas Wade, Mike Swanston, 2013-03-05 Does the world appear the same to everyone Does what we know determine what we see Why do we see the world as we do Vision is our most dominant sense From the light that enters our eyes to the complex cognitive processes that follow we derive most of our information about what things are where they are and how they move from our vision Visual Perception takes a refreshingly different approach to this enigmatic sense From the function that vision serves for an active observer to the history of visual perception itself the third edition has been extensively revised updated and expanded while still preserving the essential features of historical context neurophysiology and independent thought that made the earlier editions so engaging Covering the perception of location motion object recognition and with up to date information on the workings of the visual brain the 3rd edition looks at how our ideas have been shaped not just by psychology but by art optics biology and philosophy The emphasis on understanding vision as a basis for action in the real world has also been expanded to cover seeing representations of all sorts whether they are pictures or computer generated displays The 3rd Edition of Visual Perception is

The Illustrated Old English Hexateuch, Cotton Ms. Claudius B.iv Benjamin C. Withers, 2007-08-25 The Old English Hexateuch is a manuscript of the earliest vernacular translation of the Old Testament books of Genesis through Joshua The texts belong in part to the Anglo Saxon monk Aelfric 950-1010 and to several anonymous translators and at least one artist who compiled these translations and illustrated them with nearly four hundred narrative images which are carefully integrated into the manuscript The Hexateuch testifies to the creativity and innovation of Anglo Saxon bookmakers and stands as an important if little known witness to the relationship between early book making technology and the history of literacy Benjamin C Withers examines codicological features of the manuscript focusing on the working processes of the artist and scribes and seeking to understand how they integrated newly translated text with newly developed imagery so deftly Grounded in art history and literary theory this work considers the narrative relationships created by the careful design and seeks to place the Hexateuch within the broader social and cultural development of vernacular literacy in the eleventh century
