

TACTICAL SELF DEFENSE FLASHLIGHT

CH-102

Instruction Manual

Recharging

1. The rechargeable batteries are already installed. The unit cannot be opened, as this will void the warranty.
2. We recommend charging the stun baton before it is used. Simply plug the charging cord into the bottom of the unit and into a standard outlet. A green light will come on while the unit is charging. **IMPORTANT:** do not charge for more than 8 hours at a time. Overcharging can damage the unit and void the warranty. Under normal use the unit will need to be recharged for 8 hours every 60 days. If the LED Flashlight is used frequently or if the electrical current becomes noticeably weaker, the unit will need to be recharged.

Using the Flashlight

Overview: This unit features three light strengths (Maximum, Low, Strobe). When the situation does not require maximum light strength, the lower light settings can be used to conserve battery strength. Note that the ON/OFF Safety Switch on the bottom of unit only affects the stun mode so the light will work when this switch is set to either on or off.

1. Press the Function-Select Button until you see the flashlight turn on (remember there are three functions in the following order: Light, Stun, & Off).
2. Once the light is on you can change the light mode by half pressing the Function-Select Button. The light mode will change in the following order: Maximum, Low, Strobe. **Warning:** if you fully press the Function-Select Button the light will turn off and you will be in the Stun Mode. In this mode pressing the Stun Activation Button will discharge the stun gun (if the ON/OFF switch is set to OFF).
3. To turn off the light, fully press the Function-Select Button. Remember the order of the functions: When in light Light Function, pressing once moves the function to Stun, pressing twice moves it to Off and pressing a third time moves it back to Light.

Testing the Stun Batons (WARNING: Do not test fire the stun baton for more than 1 second as this will damage the unit and void the warranty.)

1. Slide the on/off switch on the bottom of the unit to the "ON" position.
2. Press the Function-Select Button until you are in the Stun Function (Remember there are three functions - Light, Stun, & Off).
3. The easiest way to locate the Stun Function is to fully press the Function-Select Button until you see the flashlight turn on.
4. Once the flashlight is on, press the Function-Select Button once more. The flashlight will turn off and the unit is now in Stun Function.
5. Press the Stun Activation Button to test fire the unit. Do not hold the button down for more than 1 second. You will see and hear an electrical charge fire across the top of the unit between the contact probes.
6. Once your test is complete, fully press the Function-Select Button to move out of Stun Mode. If you fully press this button once you will be in the OFF mode and if you fully press it twice you will be in the Light Mode.

Tactical Baton Manual
