Everyday Fears of Legal Immigrants with Undocumented Spouses Nina Michalikova, 2020-02-25 This book examines the adaptation experiences of legal immigrants with undocumented spouses considering the structural limitations that they face in their private social and professional lives as well as in regard to their finances and health. The first study to systematically analyze the ways in which legal immigrants are affected by federal and state policies that target their undocumented spouses, it reveals that regardless of their immigration status, all members of mixed status families are directly or indirectly subjected to the same intrusive and punitive laws. Based on an autoethnographic approach, *Everyday Fears of Legal Immigrants with Undocumented Spouses Under U.S. Immigration Policy* also draws on additional qualitative research as well as empirical evidence from existing studies and the latest quantitative data from various governmental agencies and think tanks. It thus integrates multiple approaches to ways of knowing and understanding the experiences of legal immigrants in mixed status families and will therefore appeal to social scientists with interests in migration.

Law and the Bible Robert F. Cochran, David VanDrunen, 2013-09-01 The Bible is full of law. Yet too often Christians either pick and choose verses out of context to bolster existing positions or assume that any moral judgment the Bible expresses should become the law of the land. *Law and the Bible* asks: What inspired light does the Bible shed on Christians' participation in contemporary legal systems? It concludes that more often than not the Bible overturns our faulty assumptions and skewed commitments rather than bolsters them. In the process, God gives us greater insight into what all of life, including law, should be. Each chapter is cowritten by a legal professional and a theologian and focuses on a key aspect of the biblical witness concerning civil or positive law that is law that human societies create to order their communities, implementing and enforcing it through civil government. A foundational text for legal professionals, law and prelaw students, and all who want to think in a faithfully Christian way about law and their relationship to it.

From Foreign Natives to Native Foreigners. Explaining Xenophobia in Post-apartheid South Africa M. Neocosmos,2010 The events of May 2008 in which 62 people were killed simply for being foreign and thousands were turned overnight into refugees shook the South African nation This book is the first to attempt a comprehensive and rigorous explanation for those horrific events It argues that xenophobia should be understood as a political discourse and practice As such its historical development as well as the conditions of its existence must be elucidated in terms of the practices and prescriptions which structure the field of politics In South Africa the history of xenophobia is intimately connected to the manner in which citizenship has been conceived and fought over during the past fifty years at least Migrant labour was de nationalised by the apartheid state while African nationalism saw the same migrant labour as the foundation of that oppressive system Only those who could show a family connection with the colonial and apartheid formation of South Africa could claim citizenship at liberation Others were excluded and seen as unjustified claimants to national resources Xenophobia s conditions of existence the book argues are to be found in the politics of post apartheid nationalism where state prescriptions founded on indigeneity have been allowed to dominate uncontested in conditions of an overwhelmingly passive conception of citizenship The de politicisation of an urban population which had been able to assert its agency during the 1980s through a discourse of human rights in particular contributed to this passivity Such state liberal politics have remained largely unchallenged As in other cases of post colonial transition in Africa the hegemony of xenophobic discourse the book contends is to be sought in the specific character of the state consensus

Immigration Policy in the Federal Republic of Germany Douglas B. Klusmeyer, Demetrios G. Papademetriou, 2009 German migration policy now stands at a major crossroad caught between a fifty year history of missed opportunities and serious new challenges Focusing on these new challenges that German policy makers face the authors both internationally recognized in this field use historical argument theoretical analysis and empirical evaluation to advance a more nuanced understanding of recent initiatives and the implications of these initiatives Their approach combines both synthesis and original research in a presentation that is not only accessible to the general educated reader but also addresses the concerns of academic scholars and policy analysts This important volume offers a comprehensive and critical examination of the history of German migration law and policy from the Federal Republic's inception in 1949 to the present
