Successful School Leadership Petros Pashiardis, Olof Johansson, 2016-02-25 *Successful School Leadership* identifies the characteristics, behaviours and practices of successful and effective school leaders through the adoption of a systemic view of the quality of school organizations. Capitalizing on the experiences of the international contributor team, this book will inform the preparation and further development provided to school leaders in an era where ministries of education, universities and multinational organisations such as the OECD are increasingly interested in the leadership of our schools. Perspectives on Home Language Use in Classrooms Jules, Janice E., Belgrave, Korah L., 2020-09-25 Linguists, researchers and other practitioners in language education acknowledge that the resolution of language problems associated with breaking down language and cultural barriers that hinder the growth of learners' self-identities and national identities is ongoing. In fact, even with decades of research in home language use in the classroom, there are still classrooms worldwide where learners are deprived of the opportunity of building their self-esteem, confidence and autonomy by communicating with their native language. The global nature of communication requires speakers to use all the languages in their repertoire effectively, thus reinforcing the need to encourage home language use in classrooms. *Transformative Pedagogical Perspectives on Home Language Use in Classrooms* is a cutting-edge research publication on the effective use of home language in the classroom that emphasizes the significance of this activity to the success of the overall language development of the learner. Particular attention is given to transformative pedagogy and the provision of valuable insights into how the teacher can guide and assist learners in the development of critical thinking skills. In addition, the book provides content that enables practitioners in language education and parents to explore their roles in assisting children in breaking down the language and cultural barriers that hinder the growth of their self-identity and national identity. Highlighting topics such as engineering education, cultural responsiveness and transformative pedagogy, this book is essential for linguists, academicians, education professionals, curriculum designers, policymakers, administrators, instructional designers, researchers and students. **Education in the**
