Computational Science — ICCS 2001 Vassil N. Alexandrov, Jack J. Dongarra, Benjoe A. Juliano, Rene S. Renner, C.J. Kenneth Tan, 2003-05-15 LNCS volumes 2073 and 2074 contain the proceedings of the International Conference on Computational Science ICCS 2001 held in San Francisco California May 27-31 2001. The two volumes consist of more than 230 contributed and invited papers that reflect the aims of the conference to bring together researchers and scientists from mathematics and computer science as basic computing disciplines, researchers from various application areas who are pioneering advanced application of computational methods to sciences such as physics, chemistry, life sciences and engineering, arts and humanitarian fields, along with software developers and vendors to discuss problems and solutions in the area to identify new issues and to shape future directions for research as well as to help industrial users apply various advanced computational techniques. **Handbook of Applied Spatial Analysis** Manfred M. Fischer, Arthur Getis, 2009-12-24. The Handbook is written for academics, researchers, practitioners and advanced graduate students. It has been designed to be read by those new or starting out in the field of spatial analysis as well as by those who are already familiar with the field. The chapters have been written in such a way that readers who are new to the field will gain important overview and insight. At the same time, those readers who are already practitioners in the field will gain through the advanced and/or updated tools and new materials and state of the art developments included. This volume provides an accounting of the diversity of current and emergent approaches not available elsewhere despite the many excellent journals and the books that exist. Most of the chapters are original, some few are reprints from the *Journal of Geographical Systems*, *Geographical Analysis*, *The Review of Regional Studies* and *Letters of Spatial and Resource Sciences*. We let our contributors develop from their particular perspective and insights their own strategies for mapping the part of terrain for which they were responsible. As the chapters were submitted, we became the first consumers of the project we had initiated. We gained from depth, breadth and distinctiveness of our contributors' insights and in particular the presence of links between them. *Handbook of Massive Data Sets* James Abello, Panos M. Pardalos, Mauricio G.C. Resende, 2013-12-21. The proliferation of massive data sets brings with it a series of special computational challenges.
