products and services But now any business can be devastated virtually overnight by something better and cheaper How can executives protect themselves and harness the power of Big Bang Disruption Just a few years ago drivers happily spent more than 200 for a GPS unit But as smartphones exploded in popularity free navigation apps exceeded the performance of stand alone devices Eighteen months after the debut of the navigation apps leading GPS manufacturers had lost 85 percent of their market value Consumer electronics and computer makers have long struggled in a world of exponential technology improvements and short product life spans But until recently hotels taxi services doctors and energy companies had little to fear from the information revolution Those days are gone forever Software based products are replacing physical goods And every service provider must compete with cloud based tools that offer customers a better way to interact Today start ups with minimal experience and no capital can unravel your strategy before you even begin to grasp what s happening Never mind the innovator s dilemma this is the innovator s disaster And it s happening in nearly every industry Worse Big Bang Disruptors may not even see you as competition They don t share your approach to customer service and they re not sizing up your product line to offer better prices You may simply be collateral damage in their efforts to win completely different markets The good news is that any business can master the strategy of the start ups Larry Downes and Paul Nunes analyze the origins economics and anatomy of Big Bang Disruption They identify four key stages of the new innovation life cycle helping you spot potential disruptors in time And they offer twelve rules for defending your markets launching disruptors of your own and getting out while there s still time Based on extensive research by the Accenture Institute for High Performance and in depth interviews with entrepreneurs investors and executives from more than thirty industries Big Bang Disruption will arm you with strategies and insights to thrive in this brave new world *EBOOK: Principles and Practice of Marketing, 9e* David Jobber,Fiona Ellis-Chadwick,2019-08-01 EBOOK Principles and Practice of Marketing 9e **EBOOK:**

equip students with the accounting techniques and insights necessary to succeed in today's global business environment. It reflects our combined experience in teaching financial accounting to students at all levels and in several countries. For anyone who pursues a career in business, the ability to read, analyse, and interpret published financial reports is an essential skill. Financial Accounting using IFRS is written for future business leaders who want to understand how financial statements are prepared and how the information in published financial reports is used by investors, creditors, financial analysts, and managers. Our goal is to provide the most engaging, relevant, and accessible textbook available.

TARGET AUDIENCE Financial Accounting using IFRS is intended for use in the first financial accounting course at either the undergraduate or graduate level at universities that want to teach IFRS. U.S. GAAP is not covered. This book balances the preparation of financial statements with their analysis and interpretation. This book accommodates mini courses lasting only a few days as well as extended courses lasting a full semester. Financial Accounting using IFRS is real-world oriented and focuses on the most salient aspects of accounting. It teaches students how to read, analyse, and interpret financial accounting data to make informed business decisions. To that end, it consistently incorporates real company data both in the body of each chapter and throughout the assignment material.
