World Development Report 2011 , 2011-05-26 Rapporten unders ger forandringen i voldelige konflikter i det 21 rhundrede og fremh ver de negative p virkninger som gentagne voldshandlinger har haft p lande og regioners udviklingsmuligheder

World Development Report 2012 World Bank, 2011-09-01 This year s World Development Report looks at facts and trends regarding the various dimensions of gender equality in the context of the development process

World Development Report 2009 World Bank, 2008-11-04 Rising densities of human settlements migration and transport to reduce distances to market and specialization and trade facilitated by fewer international divisions are central to economic development The transformations along these three dimensions density distance and division are most noticeable in North America Western Europe and Japan but countries in Asia and Eastern Europe are changing in ways similar in scope and speed World Development Report 2009 Reshaping Economic Geography concludes that these spatial transformations are essential and should be encouraged The conclusion is not without controversy Slum dwellers now number a billion but the rush to cities continues Globalization is believed to benefit many but not the billion people living in lagging areas of developing nations High poverty and mortality persist among the world s bottom billion while others grow wealthier and live longer lives Concern for these three billion often comes with the prescription that growth must be made spatially balanced The WDR has a different message economic growth is seldom balanced and efforts to spread it out prematurely will jeopardize progress The Report documents how production becomes more concentrated spatially as economies grow proposes economic integration as the principle for promoting successful spatial transformations revisits the debates on urbanization territorial development and regional integration and shows how today s developers can reshape economic geography

World Development Report 2010 World Bank, 2009-11-06 In the crowded field of climate change reports

WDR 2010 uniquely emphasizes development takes an integrated look at adaptation and mitigation highlights opportunities in the changing competitive landscape and proposes policy solutions grounded in analytic work and in the context of the political economy of reform

World Development Report 2013 World Bank, 2012-10 Jobs provide higher earnings and better benefits as countries grow but they are also a driver of development Poverty falls as people work their way out of hardship and as jobs empowering women lead to greater investments in children Efficiency increases as workers get better at what they do as more productive jobs appear and less productive ones disappear Societies flourish as jobs bring together people from different ethnic and social backgrounds and provide alternatives to conflict Jobs are thus more than a byproduct of economic growth They are transformational they are what we earn what we do and even who we are High unemployment and unmet job expectations among youth are the most immediate concerns But in many developing countries where farming and self employment are prevalent and safety nets are modest are best unemployment rates can be low In these countries growth is seldom jobless Most of their poor work long hours but simply cannot make ends meet And the violation of basic rights is not uncommon Therefore the number of jobs is not all that matters jobs with high development payoffs are needed Confronted with these challenges policy makers ask difficult questions Should countries build their development strategies around growth or should they focus on jobs Can entrepreneurship be fostered especially among the many microenterprises in developing countries or are entrepreneurs born Are greater investments in education and training a prerequisite for employability or can skills be built through jobs In times of major crises and structural shifts should jobs not just workers be protected And is there a risk that policies supporting job creation in one country will come at the expense of jobs in other countries The World Development Report 2013 Jobs offers answers to these and other difficult questions by looking at jobs as drivers of development not as derived labor demand and by considering all types of jobs not just formal wage employment The Report provides a framework that cuts across sectors and shows that the best policy responses vary across countries depending on their levels of development endowments demography and institutions Policy fundamentals matter in all cases as they enable a vibrant private sector the source of most jobs in the world Labor policies can help as well even if they are less critical than is often assumed Development policies from making smallholder farming viable to fostering functional cities to engaging in global markets hold the key to success

World Development Report 2008 World Bank, 2007-10-15 The world's demand for food is expected to double within the next 50 years while the natural resources that sustain agriculture will become increasingly scarce degraded and vulnerable to the effects of climate change In many poor countries agriculture accounts for at least 40 percent of GDP and 80 percent of employment At the same time about 70 percent of the world's poor live in rural areas and most depend on agriculture for their livelihoods World Development Report 2008 seeks to assess where when and how agriculture can be an effective instrument for economic development especially development that favors the poor It examines several broad questions How has agriculture changed in developing countries in the past 20

years What are the important new challenges and opportunities for agriculture Which new sources of agricultural growth can be captured cost effectively in particular in poor countries with large agricultural sectors as in Africa How can agricultural growth be made more effective for poverty reduction How can governments facilitate the transition of large populations out of agriculture without simply transferring the burden of rural poverty to urban areas How can the natural resource endowment for agriculture be protected How can agriculture's negative environmental effects be contained This year's report marks the 30th year the World Bank has been publishing the World Development Report **World Development Report 2016** World Bank Group, 2016-01-14 This Report aims to inspire and guide the researchers and practitioners who can help advance a new set of development approaches based on a fuller consideration of psychological and social influences p 2

World Development Report, 1991 This report synthesizes and interprets the lessons of more than forty years of development experience Together with last year's report on poverty and next year's on the environment it seeks to provide a comprehensive overview of the development agenda The 1990s began with dramatic changes as many countries in Eastern Europe and elsewhere initiated ambitious reforms of their economic and political systems Against the backdrop of these transitions this report links the historical debates that counseled policymakers in their past decisions the lessons of experience and the evolving thought on how best to proceed One of the most valuable lessons relates to the interaction between the state and the market in fostering development It describes a market friendly approach in which governments allow markets to function well and in which governments concentrate their interventions on areas in which markets prove inadequate The report looks at four main aspects of the relationship between governments and markets a investing in people b the climate for enterprises to flourish c the integration of countries with the global economy and d a stable macroeconomic foundation for sustained progress The report stresses that above all the future of developing countries is in their own hands Domestic policies and institutions hold the key to successful development *World Development Report 1978* World Bank Group, 1978

The Politics of Global Competitiveness Paul Cammack, 2022 Marx predicted in *Capital* 1867 that as capitalism became global patterns of work would be transformed and workers would need to develop versatility flexibility and mobility This general law of social production as he called it is now in evidence all around us in global value chains zero hours contracts and contract work organised through digital platforms It results from competition between capitalists scientific and technological revolutions in production and incessant advances in the division of labour as production processes are broken down into ever smaller steps This book documents the leading roles of the Paris based Organisation for Economic Cooperation and Development and the Washington based World Bank as advocates of these developments They do not as generally supposed simply represent the interests of the advanced economies or the West and their transnational corporations They promote a single global model of capitalist development without limits and on a genuinely global scale It calls upon all states to adjust continually to the structural and social demands of competitiveness which they see as essential

to the global hegemony of capital over labour The OECD and the World Bank propose policies that give girls and women equal access to education and paid work reform welfare to make work pay introduce flexible labour contracts that make hiring and firing easier focus education on skills that boost employability and draw workers in the developing world from the informal sector into the formal sector where they can be more productive This is the politics of global competitiveness

Development Economics through the Decades Shahid Yusuf, 2008-12-16 This volume not only offers an invaluable retrospective of the World Bank's best thinking on development but also has the analytical caliber and policy insights to become an indispensable source for those dealing with the present and future growth and equity challenges faced by the developing countries Ernesto Zedillo **World Development Report 2020** World Bank, 2019-12-23 The World Development Report WDR 2020 Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs World Development Report 2002 World Bank, 2001-08-01 Three billion people will be added to the world's population over the next 50 years and 2.8 billion people today already live on less than \$2 a day almost all in developing countries Ensuring these people have access to productive work and a better quality of life is the core development challenge of the first half of this century Growth could itself be jeopardized over the longer term unless a transformation of society and the management of the environment are addressed integrally with economic growth Now in its 25th edition this year's World Development Report examines over a 50 year period the relationship between competing policy objectives of reducing poverty maintaining growth improving social cohesion and protecting the environment The World Development Report 2003 emphasizes that many good policies have been identified but not implemented due to distributional issues and barriers to developing better institutions The Report reviews institutional innovations that might help overcome these barriers and stresses that ensuring economic growth and improved management of the planet's ecosystem requires a reduction in poverty and inequality at all levels local national and international As in previous years the report contains an appendix of selected indicators from the World Development Indicators World Development Report 2015 World Bank, 2014-12-04 Development economics and policy are due for a redesign In the past few decades research from across the natural and social sciences has provided stunning insight into the way people think and make decisions Whereas the first generation of development policy was based on the assumption that humans make decisions deliberately and independently and on the basis of consistent and self-interested preferences recent research shows that decision making rarely proceeds this way People think automatically when deciding they usually draw on what comes to mind effortlessly People also think socially social norms guide much of behavior and many people prefer to cooperate as long as others are doing their share And people think with mental models what they perceive and how they interpret it depend on concepts and worldviews drawn from their societies and from shared histories The World Development Report 2015 offers a concrete look at how these insights apply to development policy It shows how a richer view of human behavior can help achieve

development goals in many areas including early childhood development household finance productivity health and climate change It also shows how a more subtle view of human behavior provides new tools for interventions Making even minor adjustments to a decision making context designing interventions based on an understanding of social preferences and exposing individuals to new experiences and ways of thinking may enable people to improve their lives The Report opens exciting new avenues for development work It shows that poverty is not simply a state of material deprivation but also a tax on cognitive resources that affects the quality of decision making It emphasizes that all humans including experts and policy makers are subject to psychological and social influences on thinking and that development organizations could benefit from procedures to improve their own deliberations and decision making It demonstrates the need for more discovery learning and adaptation in policy design and implementation The new approach to development economics has immense promise Its scope of application is vast This Report introduces an important new agenda for the development community **World**

Development Report 2024 World Bank,2024-08-01 Middle income countries are in a race against time Many of them have done well since the 1990s to escape low income levels and eradicate extreme poverty leading to the perception that the last three decades have been great for development But the ambition of the more than 100 economies with incomes per capita between US 1 100 and US 14 000 is to reach high income status within the next generation When assessed against this goal their record is discouraging Since the 1970s income per capita in the median middle income country has stagnated at less than a tenth of the US level With aging populations growing protectionism and escalating pressures to speed up the energy transition today s middle income economies face ever more daunting odds To become advanced economies despite the growing headwinds they will have to make miracles Drawing on the development experience and advances in economic analysis since the 1950s World Development Report 2024 identifies pathways for developing economies to avoid the middle income trap It points to the need for not one but two transitions for those at the middle income level the first from investment to infusion and the second from infusion to innovation Governments in lower middle income countries must drop the habit of repeating the same investment driven strategies and work instead to infuse modern technologies and successful business processes from around the world into their economies This requires reshaping large swaths of those economies into globally competitive suppliers of goods and services Upper middle income countries that have mastered infusion can accelerate the shift to innovation not just borrowing ideas from the global frontiers of technology but also beginning to push the frontiers outward This requires restructuring enterprise work and energy use once again with an even greater emphasis on economic freedom social mobility and political contestability Neither transition is automatic The handful of economies that made speedy transitions from middle to high income status have encouraged enterprise by disciplining powerful incumbents developed talent by rewarding merit and capitalized on crises to alter policies and institutions that no longer suit the purposes they were once designed to serve Today s middle income countries will have to do the same **World**

Development Report 2024 World Bank,2024-09-13 *World Development Report 2005* World Bank,2004 Firms and entrepreneurs of all types from microenterprises to multinationals play a central role in growth and poverty reduction Their investment decisions drive job creation the availability and affordability of goods and services for consumers and the tax revenues governments can draw on to fund health education and other services Their contribution depends largely on the way governments shape the investment climate in each location through the protection of property rights regulation and taxation strategies for providing infrastructure interventions in finance and labor markets and broader governance features such as corruption The World Development Report 2005 argues that improving the investment climates of their societies should be a top priority for governments Drawing on surveys of nearly 30 000 firms in 53 developing countries country case studies and other new research the Report explores questions such as What are the key features of a good investment climate and how do they influence growth and poverty What can governments do to improve their investment climates and how can they go about tackling such a broad agenda What has been learned about good practice in each of the main areas of the investment climate What role might selective interventions and international arrangements play in improving the investment climate What can the international community do to help developing countries improve the investment climates of their societies In addition to detailed chapters exploring these and related issues the Report contains selected data from the World Bank s new program of Investment Climate Surveys the Bank s Doing Business Project and World Development Indicators 2004 an appendix of economic and social data for over 200 countries This Report offers practical insights for policymakers executives scholars and all those with an interest in economic development **Worldmark Encyclopedia of the Nations: Asia & Oceania** ,2007 *World Development Report* ,1995 This eighteenth annual report assesses what a more market driven and integrated world means for workers It asks which development strategies best address workers needs and what domestic labor market policies can do to establish a more equitable distribution of income greater job security and higher workplace standards while preserving and indeed enhancing the efficiency of labor markets The report concludes that global integration holds out the prospect of tremendous future gains for the world s work force but no guarantees Sound domestic and international policies are indispensable for realizing the promise of a prosperous integrated global workplace Policies that rely on markets while avoiding or correcting market failures that invest in people that provide a supportive environment for family farms as well as emerging industrial and service sectors all these are good for workers Governments continue to exercise important functions building and maintaining the social framework within which workers unions and firms interact to set wages and working conditions supporting workers who are hurt when industries or whole economies suffer major shocks and defending the rights of the most vulnerable workers whether they be child laborers victimized by exploitation or women or ethnic minorities suffering from discrimination In those economies that are less prepared to face global competition in particular those emerging from central planning public action has a particularly

important role in promoting labor mobility easing the cost of transition and reaching those left out
