World Vision Security Manual:

World Vision Security Manual Brian Sytsma, 1999-01-01 A safety manual this designed to help create a complete personnel safety policy for international aid workers and missionaries Reordering Security Ian Loader, Sarah Percy, 2017-10-02 Traditional security distinctions are being rapidly eroded Lines drawn between war and crime are blurring with fateful consequences for divisions between militaries and police forces The assumption that security should be a publicly provided good has been challenged by private security providers both domestic and international Security is no longer if it ever was divided between what goes on inside one state and what occurs between states However our disciplinary tools for examining these security challenges remain resolutely focused on either the domestic or the international This book makes one of the first attempts to examine security from both perspectives bringing together and into much needed conversation the fields of criminology and international relations This book was originally published as a special issue of Global Crime

Humanitarian NGOs, (In)Security and Identity Andrea Schneiker, 2016-03-09 Increasingly humanitarian NGOs operate in the context of armed conflicts where the security risks are higher than in contexts of natural disaster Working in Afghanistan Somalia Sudan South Sudan Pakistan and Sri Lanka is particularly dangerous for humanitarians This existential threat affects the physical existence of aid workers and the implementation of humanitarian programs and the core beliefs of humanitarians and the underlying principles of humanitarian action For NGOs it is difficult to accept that they are attacked despite their good intentions sometimes even by the very communities they seek to help For these reasons humanitarian NGOs have to change their approaches to security by not only adapting their policies procedures and structures to the changing environment but also reviewing the underlying principles of their work This book contributes to debates by demonstrating how issues of in security affect humanitarian NGOs and the humanitarian identity situating the structural changes within the humanitarian NGO community in the context of conflict aid governance and explains how non state actors establish their own governance structures independent from state sponsored solutions and contributes to the emerging literature on the redefinition of the concept of epistemic communities Safety First Shaun Bickley, 2010 Aid work has always been a hazardous profession But now the dangers appear to be increasing Safety First makes aid workers aware of the risks they may encounter while working in the field and what they can do to minimise them **Hierarchies and**

exclusion in humanitarianism Clara Egger, 2025-06-24 While humanitarians generally present themselves as do gooders and use this image to gather support and funding this edited volume addresses hierarchies and exclusions in humanitarianism an issue that has gained increased attention Contributions analyse how hierarchies power asymmetries and exclusion emerge are maintained and can ultimately be challenged in humanitarian governance Leading scholars on humanitarianism coming from a variety of disciplinary fields such as international relations philosophy organisational science and management and sociology analyse exclusion dynamics at the individual organisational and structural levels Authors

thereby combine data from a diverse range of methods including ethnography survey and statistical analysis The volume informs current efforts to increase inclusiveness and equity in humanitarian practice

The Return of the Public in Global Governance Jacqueline Best,Alexandra Gheciu,2014-02-20 After decades of neoliberalism the public is back but in ways that challenge conventional wisdom about the public private divide

The Market for Force Deborah D. Avant,2005-07-25 The legitimate use of force is generally presumed to be the realm of the state However the flourishing role of the private sector in security over the last twenty years has brought this into question In this book Deborah Avant examines the privatization of security and its impact on the control of force She describes the growth of private security companies explains how the industry works and describes its range of customers including states non government organisations and commercial transnational corporations She charts the inevitable trade offs that the market for force imposes on the states firms and people wishing to control it suggests a new way to think about the control of force and offers a model of institutional analysis that draws on both economic and sociological reasoning The book contains case studies drawn from the US and Europe as well as Africa and the Middle East

The Humanitarian Companion John Ehrenreich,2005 Written with both the new humanitarian worker and the experienced veteran in mind the book deals in turn with the main stages of a humanitarian assignment It deals with safety and security in the field staying healthy managing stress coping with the trauma of others and dealing with returning home at the end of an assignment
