World Investment Directory ,2004 **The Political Economy of Globalization** Satya Dev Gupta, 2012-12-06

Globalization is transforming the world at an accelerated pace Integration of the world continues widening and intensifying international linkages in economic political and social relations Liberalization of trade and finance lubricated by revolutionary changes in information technology has resulted in significant economic growth at the global level On the other hand the process of globalization is changing the nature of production relations threatening the traditional roles of the nation state and carrying with it far reaching implications for sustainable growth development and the environment Although both developed and developing countries are actively participating in this saga of globalization nearly ninety countries as the United Nations Human Development Report 1996 indicates are worse off economically than they were ten years ago leading to global polarization between haves and have nots The report further indicates that the gap between the per capita incomes of the industrialized world and the developing countries far from narrowing has more than tripled during the last thirty years Further a majority of the countries benefitting from this globalization drive have seen a rise in inequality and poverty This failure of market driven globalization to reward the benefits equitably led the United Nations to proclaim 1996 as the International Year for the Eradication of Poverty IYEP and the decade of 1997 2006 as the international decade for the eradication of poverty and to promote people centered sustainable development The Process of Economic Development James M. Cypher, 2020-12-30 The fifth edition of The Process of Economic Development offers a thorough and up to date treatment of development economics It has been extensively revised throughout reflecting the most recent developments in research and incorporating the latest empirical data as well as key theoretical advances and many new topics The world has seen vast economic growth in China economic transformation in India new challenges in Latin America rapid economic progress in Southeast Asia and the deepening impact of environmental issues such as climate change This new edition

addresses all these critical issues as well as the pivotal role of the state where China's capacity is contrasted with that of African states. Transnational corporations' reliance on low wage manufacturing and labor arbitrage is featured in the book. Agricultural policy extensively explored remains crucial as does the promotion of industrialization. This fifth edition offers a state of the art analysis of these essential themes and many others. Numerous case studies and issue focuses have been integrated with sundry central topics. Neoclassical theories and applications including a timely exploration of behavioral economics are both rigorously and accessibly explicated. Cypher's comprehensive account remains the development economics text par excellence as it takes a much more practical hands on view of the issues facing the developing countries than other overly mathematical texts. This book is unique in its scope and in the detailed attention it gives to a vast range of ideas including pioneering developmentalist and heterodox formulations. Distinct institutional structures are examined within their historical contexts. This landmark text will continue to be an invaluable resource for students, teachers and researchers in the fields of development economics and development studies.
