Preparing for War: The Making of the 1949 Geneva Conventions Boyd van Dijk, 2022-02-03 The 1949 Geneva Conventions are the most important rules for armed conflict ever formulated To this day they continue to shape contemporary debates about regulating warfare but their history is often misunderstood For most observers the drafters behind these treaties were primarily motivated by liberal humanitarian principles and the shock of the atrocities of the Second World War This book tells a different story showing how the final text of the Conventions far from being an unabashedly liberal blueprint was the outcome of a series of political struggles among the drafters It also concerned a great deal more than simply recognizing the shortcomings of international law revealed by the experience of war To understand the politics and ideas of the Conventions drafters is to see them less as passive characters responding to past events than as active protagonists trying to shape the future of warfare In many different ways they tried to define the contours of future battlefields by deciding who deserved protection and what counted as a legitimate target Outlawing illegal conduct in wartime did as much to outline the concept of humanized war as to establish the legality of waging war itself Through extensive archival research and critical legal methodologies Preparing for War establishes that although they did not seek war the Conventions drafters prepared for it by means of weaving a new legal safety net in the event that their worst fear should materialize a spectre still haunting us today

Battlegroup! Jim Storr, 2021-11-03 What can we learn from the unfought battles of the Cold War? Could any supposed British superiority at the unit level or superior American equipment and technology have as much effect on a possible Warsaw Pact attack as the Bundeswehr's apparent mastery of formation tactics? The Cold War dominated the global events for over 40 years. Much of the world genuinely believed that a nuclear war might break out at any moment. Millions of men were involved. National budgets strained to equip and sustain them. Much of Europe had to endure conscription, tank convoys clogging up the roads, low flying jet aircraft, and large scale mobilization exercises. But what do we really know about the Cold War? More importantly, what can we learn from it? *Battlegroup!* investigates the unfought land battles of the Cold War on the Central Front. It focusses on the 1980s. It looks solely at high intensity conventional warfare largely from NATO's perspective. It concentrates on the lower tactical levels from company to brigade or perhaps division. It considers the tactics, organization, and equipment of the American, British, West German, French, and Soviet armies. The book discusses what battles would have been fought, then how they would have been fought, and lastly what we can learn from that. The first section looks at the strategic and operational setting and the armies involved. The second section

looks at the components of a land force how those components were organized and would fight and assembles them into battlegroups brigades and divisions Battlegroup then steps through the tactics of land warfare delay defense and withdrawal advance attack and counterattack fighting in woods built up areas and at night and air support to land operations The final section of the book illustrates some of the possible early engagements of any war on the Central Front It then draws out the major observations and conclusions Battlegroup relies heavily on two previously untapped sources virtually unknown to English speaking audiences They explain much of the Bundeswehr s highly individual approach to defeating a potential Warsaw Pact attack This is not a counterfactual history It does not attempt to say who would have won the Third World War It explodes some myths It will be uncomfortable reading for some and contentious in places Battlegroup will be essential reading for anyone interested in warfare of the last decade of the Cold War be it as a professional an academic or a wargamer
