The Failure of Leadership in Africa's Development Ike Okonta, 2020-02-13 The Failure of Leadership in Africa s Development examines the dominant scholarly theories about the cause of Africa s underdevelopment and argues that none of the traditionally invoked causes an alleged black racial inferiority the colonial and neo colonial expropriation of Africa purported natural defects in Africa s geography is plausible as the explanation of the main cause of the continent s underdevelopment Rather the book argues that the chief cause of the continent s lag is the failure of leadership of Africa s ruling classes This failure of leadership the book shows is most evident in the historically traceable indifference of a long succession of Africa s ruling classes to the scientific and technological advances that were emerging from Europe and Asia during the most critical periods of Africa s history It was this indifference the book argues that set the stage for the subsequent conquest expropriation and technological stagnation of Africa The book recommends a blueprint for the continent s future development

 knowledge making it an invaluable resource for any academic library *The Pursuit of Human Well-Being* Richard J.
 Estes, M. Joseph Sirgy, 2017-01-09 This handbook informs the reader about how much progress we the human race have
 made in enhancing the quality of life on this planet Many skeptics focus on how the quality of life has deteriorated over the
 course of human history particularly given World War II and its aftermath This handbook provides a positive perspective on
 the history of well being Quality of life as documented by scientists worldwide has significantly improved Nevertheless one
 sees more improvements in well being in some regions of the world than in others Why This handbook documents the
 progress of well being in the various world regions as well as the differences in those regions The broad questions that the
 handbook addresses include What does well being mean How do different philosophical and religious traditions interpret the
 concept of well being within their own context Has well being remained the same over different historical epochs and for
 different regions and subregions of the world In which areas of human development have we been most successful in
 advancing individual and collective well being In which sectors has the attainment of well being proven most difficult How
 does well being differ within and between different populations groups that for a variety of socially created reasons have
 been the most disadvantaged e g children the aged women the poor racial ethnic and sexual minorities *Alternative
 Tourism in Turkey* Istvan Egresi, 2016-12-08 This book takes inventory of and evaluates the available resources for the
 development of alternative tourism in Turkey It examines the role of alternative tourism in future tourism development plans
 and proposes public policies necessary to assure sustainability Although tourism started later in Turkey than in the Western
 Mediterranean countries it has grown very rapidly during the last three decades and today the country ranks among the top
 ten countries in the world in terms of both arrivals and receipts However most of the tourism development has been in the
 mass tourism sector or the so called sun sea sand tourism While crucial for the economic development of Turkey mass
 tourism in the absence of proper planning has happened in a haphazard manner leading to numerous environmental and
 socio cultural problems This book argues that in order to mitigate these problems Turkey should encourage the development
 of alternative forms of tourism Urban Environment, Travel Behavior, Health, and Resident Satisfaction Anzhelika
 Antipova, 2018-05-09 This book explores the intersections of urban development travel patterns and health Currently there is

a lack of research concerning the subjective dimensions of accessibility in urban environments and travel behavior as well as travel related outcomes Antipova fills this gap in the scholarship by developing an analysis of satisfaction and perception related indicators at an intraurban level Specifically she investigates various aspects of urban environment from the perspective of resident perception and satisfaction as well as the relationship between urban environment travel behavior activity patterns and traveler health

Sustainable Energy Pricing Gary M. Zatzman,2012-02-07 This is the first book to address the issues of affordable power sustainable energy and reduced environmental impact through the science of energy pricing Looking at the availability of natural resources from an engineering perspective and determining how they can be priced to achieve sustainability in the energy sector is the aim of this groundbreaking new work Most current models used in energy pricing are based on linear analyses While these models work well for targeted scenarios within a short time frame they do not provide one with a scientific tool that can include many facets of the information age The existing models do not include environmental sustainability in an integrated fashion This is mainly because environmental costs are still considered to be intangible and intractable with conventional economic analysis tools Though one existing model acknowledges some possible theoretical truth to concerns expressed about the onset of peak oil the period in which new oil production must begin a decline of unknown and indefinite duration this model has little or nothing to say about continuing practices in the extraction and production of fossil fuel that are themselves based on denying any significance or role for such thinking in the immediate future A serious limitation of that discourse is its insistence on polarizing opinions for or against environmental sustainability peak oil and affordable energy prices This book proceeds instead to isolate the absence of any agreed criteria for what would constitute inherently sustainable development and examines the main outlines of the history and political economy of energy resource exploration and development since the 1850s from this standpoint It proposes specific directions in which to take some of the leading alternatives and amendments to current energy pricing practices as well as some of the most promising energy development alternatives in order to fulfill the time criteria required for an inherently sustainable trend The author shows how and why identifying unsustainable practices and consequences can make a case for closing down particular oil and gas production operations while averting the time wasting approach of trying to fix what really has gone beyond fixing However it is possible necessary and actually far better to replace these methods with newer scientifically based methods for achieving overall energy sustainability
