

Figure 1. Top international country-to-country migration corridors, 2024

Source: UN DESA, 2021a; UNHCR, 2023a.

Notes: The corridors represent the number of international migrants (millions) born in the first-mentioned country and residing in the second. Corridors represent an accumulation of migratory movements over time and provide a snapshot of how migration patterns have evolved into significant foreign-born populations in specific destination countries.

Those corridors comprising mainly displaced persons are coloured **orange**. Revisions have been made based on large-scale displacement from Ukraine to neighbouring countries (as at end October 2023).

World of Walls Said Saddiki, 2017-10-09 We're going to build a wall. Borders have been drawn since the beginning of time, but in recent years, artificial barriers have become increasingly significant to the political conversation across the world. Donald Trump was elected President of the United States while promising to build a wall on the Mexico border, and in Europe, the international movements of migrants and refugees have sparked fierce discussion about whether and how countries should restrict access to their territory by erecting physical barriers. Virtual walls are also built and crushed at increasing speed. In the post-9/11 era, there is a greater danger from so-called transnational non-state actors, and computer hacking and cyberterrorism threaten to overwhelm our technological barriers. In this timely and original book, Said Saddiki scrutinises the physical and virtual walls located in four continents, including Israel, India, the southern EU border, Morocco, and the proposed border wall between Mexico and the US. Saddiki's detailed analysis explores the tensions between the rise of globalisation, which some have argued will lead to a borderless world, and the end of the nation-state, and the rapid development in recent decades of border control systems. Saddiki examines both regular and irregular cross-border activities, including the flow of people, goods, ideas, drugs, weapons, capital, and information, and explores the disparities that are reflected by barriers to such activities. He considers the consequences of the construction of physical and virtual walls, including their impact on international relations and the rise of the multi-billion dollar security market. *World of Walls: The Structure, Roles, and Effectiveness of Separation Barriers* is important reading for all those interested in the topics of immigration, border security, international relations, and policy.

Borderline Slavery Susan Tiano, Moira Murphy-Aguilar, 2016-04-08 Exploring human trafficking in the US-Mexico borderlands as a regional expression of a pressing global problem, *Borderline Slavery* sheds light on the contexts and causes of trafficking, offering policy recommendations for addressing it that do justice to border communities' complex circumstances. This book focuses on both sexual and labor trafficking, proceeding thematically from global to regional levels to provide an empirically grounded, theoretically informed, and policy-relevant approach which examines the problem through the eyes of

scholars and researchers from various fields as well as journalists public officials law enforcement personnel victims advocates and NGO representatives Discussing the multinational networks global economics and personal motives that fuel a multibillion dollar trade in human beings as cheap labor Borderline Slavery suggests future directions for effective policies and law enforcement strategies to prevent the advance of human trafficking As such it will be of interest to both policy makers and scholars across the social sciences working in the fields of migration exploitation and trafficking

Transnational Migration and Human Security Thanh-Dam Truong, Des Gasper, 2011-06-07 The volume places the migration development security nexus in the field of transnational studies Rather than treating these three categories as self evident the essays excavate aspects of power and privilege built into their governing frameworks and

conflicting rationales apparent in practices of control Bringing together diverse experiences and case studies the volume highlights the problematic nature of maintaining distinct and disconnected frameworks of governance It argues for a new approach that demonstrates the significance and usefulness of comparative ethics in conceptualising migration from a human centered and gendered perspective in order to address the multi faceted and multi dimensional nature and meanings of security

International Migration in Thailand 2009 Rosalia Sciortino,International Organization for Migration,2009 **Asian and Pacific Migration Journal** ,2009 **Angola** Sandra Paola Alvarez Tinajero,2010 This study sheds some light into the kinds of relationships that Angolans living in Portugal and South Africa keep with their country of origin focusing on the financial remittances that they send back to Angola as well as on aspects such as the level of organization and the transnational engagement of these communities in the development of their country of origin This study shows that there are many opportunities to further involve Angolans abroad in development cooperation Facilitating remittance transfers through the adoption of appropriate policies and regulations to foster competition among service providers in bilateral corridors as well as internally is one example Most importantly reaching out to Angolans in Portugal and south Africa and building trust among these groups seems to be a precondition for enhancing the role of Angolan diasporas in development Publisher s website

Labour Markets Performance and Migration Flows in Arab Mediterranean Countries: National background papers Mashreq (Egypt, Palestine, Jordan, Lebanon, Syria) European Commission. Directorate-General for Economic and Financial Affairs,2010 This study which analyzes the key labor market determinants of migration flows from selected Arab Mediterranean Countries Algeria Egypt Jordan Lebanon Morocco Syria Tunisia and the Occupied Palestinian Territories finds that employment in AMCs is a major challenge for the region and for Europe in the next 10 to 15 years Immediate action is needed because the status quo risks causing permanent damage to the development prospects of

those countries The AMCs public policies are currently ill equipped to face the challenge Labor migration remains a key feature of the labor markets in these countries yet cannot by itself solve the labor market challenges there The study makes a number of recommendations including upgrading the statistics available and conducting further in depth analysis upgrading education and training systems mainstreaming the policy goal of job creation and higher productivity promoting active labor market policies creating incentives to hire new graduates and women creating incentives to transform informal into formal employment and establishing social protection systems guaranteeing universal coverage with the emphasis on worker rather than job protection It also recommends that the EU upgrade its existing framework for AMC migration not only as a unilateral strategy but as a cooperative framework for true co development Publisher s description
