Characterising Locally Finite Groups Satisfying the Strong Sylow Theorem for the Prime p - Part 1 of a Trilogy

Dipl.-Math. Felix Flemisch, 2023-03-07 Part 1 of the Trilogy Characterising Locally Finite Groups Satisfying the Strong Sylow Theorem for the Prime p About the Strong Sylow Theorem for the Prime p in Simple Locally Finite Groups The Strong Sylow Theorem for the Prime p in Projective Special Linear Locally Finite Groups is based on the beautiful BoD Book Characterising locally finite groups satisfying the strong Sylow Theorem for the prime p Revised edition see ISBN 978 3 7562 3416 5 which in turn has been based on the author's research paper Characterising Locally Finite Groups Satisfying the Strong Sylow Theorem for the Prime p that was published on pp 13 39 of Volume 13 of the gratifyingly open access mathematical journal Advances in Group Theory and Applications AGTA see <https://www.advgrouptheory.com/journal/read> Part 1 removes the highlights in light green of the Revised edition and adds the albeit considerably improved Pages i to vi Pages 26a to 26f and Pages xiii to xviii to the AGTA paper In addition it adds the ten new Pages xv to xxiv to the Revised edition and thus renumbers the Pages xv to xviii into the Pages xxv to xxviii It includes Reference 11 as Appendix 1 and Reference 10 as Appendix 2 Finally it calls to mind Prof Otto H Kegel's fine contribution to the conference Ischia Group Theory 2016 *First Trilogy about Sylow Theory in Locally Finite Groups* Felix F. Flemisch, 2023-11-15 Part 1 ISBN 978 3 7568 0801 4 of the Trilogy is based on the BoD Book Characterising locally finite groups satisfying the strong Sylow Theorem for the prime p Revised edition see ISBN 978 3 7562 3416 5 The First edition of Part 1 see ISBN 978 3 7543 6087 3 removes the highlights in light green of the Revised edition adds 14 pages to the AGTA paper and 10 pages to the Revised edition It includes Reference 11 resp 10 as Appendix 1 resp Appendix 2 and calls to mind Professor Otto H Kegel's contribution to the conference Ischia Group Theory 2016 The Second edition introduces a uniform page numbering adds page numbers to the appendices improves 19 pages adds Pages 109 to 112 and a Table of Contents Part 2 ISBN 978 3 7543 3642 8 of the Trilogy is based on the author's research paper About the Strong Sylow Theorem for the Prime p in Simple Locally Finite Groups We first give an overview of simple locally finite groups and reduce their Sylow theory for the prime p to a conjecture of Prof Otto H Kegel about the rank unbounded ones of the 19 known families of finite simple groups Part 2 introduces a new scheme to describe the 19 families the family T of types defines the rank of each type and emphasises the role of Kegel covers This part presents a unified picture of known results and is the reason why our title starts with About We then apply new ideas to prove the conjecture for the alternating groups see Page ii Thereupon we remember Kegel covers and sequences Finally we suggest a plan how to prove the conjecture step by step which leads to further conjectures thereby unifying Sylow theory in locally finite simple groups with Sylow theory in locally finite and p soluble groups In Part 3 ISBN 978 3 7578 6001 1 of the Trilogy we continue the program begun in 10 to optimise along the way 1 its Theorem about the first type A_n of infinite families of finite simple groups step by step to further types by proving it for the second type A_{PSLn} We start with

proving the Conjecture 2 of 10 about the General Linear Groups by using new ideas see Page ii and then break down this insight to the Special Linear and the PSL Groups We close with suggestions for future research regarding the remaining rank unbounded types the Classical Groups and the way 2 the locally finite and p soluble groups and Augustin Louis Cauchy's and Galois contributions to Sylow theory in finite groups

Global Perspectives on Decolonizing Postgraduate Education Gumbo, Mishack Thiza, Gaotlhobogwe, Michael, Pedzisai, Constantino, Jojo, Zingiswa Mybert Monica, Knaus, Christopher B., 2024-05-13 A deep seated issue persists in postgraduate education one that threatens the relevance of academia in our diverse and evolving world The problem at hand is the Western centric nature of postgraduate education where research paradigms methodologies and theoretical frameworks overwhelmingly reflect a Western worldview This rigid adherence to Western ideologies has left indigenous communities on the periphery of academic discourse denying them the opportunity to engage with their knowledge systems and practices Despite the richness and prevalence of indigenous knowledge the existing educational structure remains a barrier to their inclusion This disconnect is not only an academic concern but also a societal one as it hinders sustainable development and stifles the voices of indigenous scholars and students Global Perspectives on Decolonizing Postgraduate Education serves as a compelling solution to the problem at hand It offers a comprehensive roadmap to decolonize postgraduate education infusing it with indigenous approaches paradigms theories and methods Through critical examination and practical strategies this book empowers academics curriculum designers and postgraduate students to embark on a transformative journey

Indigenous Engineering for an Enduring Culture Cat Kutay, Elysebeth Leigh, Juliana Kaya Prpic, Lyndon Ormond-Parker, 2022-09-28 For many millennia Indigenous Australians have been engineering the landscape using sophisticated technological and philosophical knowledge systems in a deliberate response to changing social and environmental circumstances These knowledge systems integrate profound understanding of country and bring together knowledge of the topography and geology of the landscape its natural cycles and ecological systems its hydrological systems and natural resources including fauna and flora This enables people to manage resources sustainably and reliably and testifies to a developed contextualised knowledge system and to a society with agency and the capability to maintain and refine accumulated knowledge and material processes This book is a recognition and acknowledgement of the ingenuity of Indigenous engineering which is grounded in philosophical principles values and practices that emphasise sustainability reciprocity respect and diversity and often presents a much needed challenge to a Western engineering worldview Each chapter is written by a team of authors combining Indigenous knowledge skills and academic expertise providing examples of collaboration at the intersection of Western and Indigenous engineering principles sharing old and new knowledges and skills These varied approaches demonstrate ways to integrate Indigenous knowledges into the curricula for Australian engineering degrees in line with the Australian Council of Engineering Deans Position Statement on Embedding Aboriginal and Torres Strait Islander perspectives into the engineering curriculum first

published in 2017 **Sustainable Development Goals for Society Vol. 1** Godwell Nhamo, Muchaiteyi Togo, Kaitano Dube, 2021-06-16 Written by 43 authors from Africa Europe and Latin America this book presents 19 topics addressing poverty in the context of Sustainable Development Goals SDGs leadership in implementing SDGs and SDGs in service delivery and local government As the world has gone past five years of implementing the 2030 Agenda for Sustainable Development and the intertwined 17 SDGs new opportunities in research continue to open up Hence documenting some of the initiatives put in place around the world regarding the implementation of the SDGs is one of the aims of this publication With 10 years remaining the book further enhances the desire to scale up SDGs implementation The selection of case studies from the selected regions also provides a balance in terms of how the SDGs are being rolled out for economic growth environmental stewardship and social protection The ambition remains even with the challenge brought by the COVID 19 pandemic that preoccupied the whole of 2020 spilling over to 2021 There is no doubt that resources have been diverted but the world must stay on the course to 2030 and beyond Therefore the book is relevant for several stakeholders including the academics development partners government officials and other individuals that are involved in making sure no one is left behind in the lead to 2030 *Responsible Research Practice* Norma RA Romm, 2018-04-21 This book explores ways in which creative research practice can be explicitly and mindfully geared to make a difference to the quality of social and ecological existence It offers a range of examples of how different research methods can be employed and re tuned with this intention The book suggests that what Romm names active research involves using the research space responsibly to open up new avenues for thinking and acting on the part of those involved in the inquiry and wider stakeholders The book includes a discussion of a range of epistemological ontological methodological and axiological positions or paradigms that can be embraced by inquirers implicitly or explicitly It details the contours of an epistemology where knowing is recognized to be grounded in social relations as a matter of ethics While focusing on discussing the transformative paradigm and attendant view of research ethics it considers to what extent the borders between paradigms can be treated as being permeable in creative and active inquiries Apart from considering options for enhancing responsible research practice during the process of inquiry and reconsidering mixed research designs the book also considers options for responsible theorizing that is inspirational for pursuing goals of social and ecological justice **The Strong Sylow Theorem for the Prime p in Simple Locally Finite Groups** Dipl.-Math. Felix F. Flemisch, 2024-04-10 This research paper continues 15 We begin with giving a profound overview of the structure of arbitrary simple groups and in particular of the simple locally finite groups and reduce their Sylow theory for the prime p to a quite famous conjecture by Prof Otto H Kegel see 37 Theorem 2.4 Let the p subgroup P be a p uniqueness subgroup in the finite simple group S which belongs to one of the seven rank unbounded families Then the rank of S is bounded in terms of P about the rank unbounded ones of the 19 known families of finite simple groups We introduce a new scheme to describe the 19 families the family T of types define the rank of each type and emphasise the r le

of Kegel covers This part presents a unified picture of known results whose proofs are by reference Subsequently we apply new ideas to prove the conjecture for the alternating groups Thereupon we are remembering Kegel covers and sequences Next we suggest a way 1 and a way 2 how to prove and even how to optimise Kegel s conjecture step by step or peu peu which leads to Conjecture 1 Conjecture 2 and Conjecture 3 thereby unifying Sylow theory in locally finite simple groups with Sylow theory in locally finite and p soluble groups whose joint study directs Sylow theory in locally finite groups For any unexplained terminology we refer to 15 We then continue the program begun above to optimise along the way 1 the theorem about the first type An of infinite families of finite simple groups step by step to further types by proving it for the second type A PSL $_n$ We start with proving Conjecture 2 about the General Linear Groups over commutative locally finite fields stating that their rank is bounded in terms of their p uniqueness and then break down this insight to the Special Linear Groups and the Projective Special Linear PSL Groups over locally finite fields We close with suggestions for future research regarding the remaining rank unbounded types the Classical Groups and the way 2 regarding locally finite and p soluble groups and regarding Cauchy s and Galois contributions to Sylow theory in finite groups We much hope to enthuse group theorists with them We include the predecessor research paper 15 as an Appendix

Sustainable Development Goals for Society Vol. 2 Godwell Nhamo, David Chikodzi, Kaitano Dube, 2021-06-26 This book profiles various cases that are emerging in addressing global challenges in the context of SDGs for society in the era of climate change and covers case studies of projects being undertaken to tackle biodiversity food security climate change energy and water security The book is written by 37 authors and will appeal to various stakeholders including academics working within the identified thematic areas policy planners development agencies governments and United Nations agencies The adoption of the Sustainable Development Goals SDGs in 2015 ushered a new era in the global development agenda as the world transitioned from the Millennium Development Goals MDGs The new era of SDGs that are all inclusive unlike the MDGs with the focus now being on ensuring human success that is predicated on environmental protection The year 2020 marked five years post the adoption of the SDGs with increased calls for stock taking of progress made amid strong calls for a decade of action to accelerate the delivery of the SDGs by 2030 These calls have been louder now given the impact of the COVID 19 pandemic which reset the global economy and increased intensity of extreme weather events across the world Since climate change has emerged as one of the biggest threats to the achievement of the SDGs there has been growing concerns on its impact on biodiversity loss and the extinction of some species There are also concerns regarding increased food insecurity at the household level in some parts of the world particularly in Asia and Africa With the demand for climate change action on the increase there have also been growing calls for the big carbon emitters to drastically cut their emissions and invest in clean energy to save the planet by following development pathways making emissions stay under the 1.5 °C increase in temperature

Intersections in Language Planning and Policy Jean Fornasiero, Sarah M. A. Reed, Rob Amery, Eric Bouvet, Kayoko

Enomoto,Hui Ling Xu,2020-09-28 This volume encompasses the range of issues encountered by language scholars who teach and research in departments of languages and cultures within the higher education system predominantly in Australia but touching other universities worldwide Related studies on language planning methodology or pedagogy have focused on one or more of these same issues but rarely on their totality Intersections as a metaphor running discreetly through the essays in this volume connects them all to a lived reality The field of languages and cultures as it is practised and reflected upon in Australian universities is essentially an interdisciplinary and interconnecting space one in which linguistic and disciplinary diversities meet and join forces rather than collide or disperse along different pathways The international and local studies featured here focus on language planning new pedagogies and language reclamation and link to meeting points and commonalities They show that language scholars are increasingly finding themselves on common ground as they tackle issues of policy and practice affecting their field whether within their institutions within the tertiary system or within the framework of government policy

Sustainable Development in Africa Walter Leal Filho,Rudi Pretorius,Luiza Olim de Sousa,2021-07-09 This book serves the purpose of documenting and promoting African experiences on sustainable development which encompasses both formal and non formal education Sustainable development is very important to Africa but there is a paucity of publication which documents and promotes experiences from African countries Due to their complexity the interrelations between social economic and political factors related to sustainable development especially at universities need to be better understood There is also a real need to showcase successful examples of how African institutions are handling their sustainability challenges It is against this background that this book has been produced It is a truly interdisciplinary publication useful to scholars social movements practitioners and members of governmental agencies and private companies undertaking research and or executing projects focusing on sustainability from across Africa As African nations strive to pursue the UN Sustainable Development Goals it is imperative to cater for the information needs seen across the continent and foster the dissemination of experiences and case studies which may support both on going and future efforts The scope of the book is deliberately kept wide and we are looking for contributions across the spectrum of sustainable development from business and economics to arts and fashion administration environment languages and media studies
