Kristen N. Bieda, AnnaMarie Conner, Karl W. Kosko, Megan Staples, 2022-03-03 This book aims to advance ongoing debates in the field of mathematics and mathematics education regarding conceptions of argumentation justification and proof and the consequences for research and practice when applying particular conceptions of each construct Through analyses of classroom practice across grade levels using different lenses particular conceptions of argumentation justification and proof researchers consider the implications of how each conception shapes empirical outcomes In each section organized by grade band authors adopt particular conceptions of argumentation justification and proof and they analyse one data set from each perspective In addition each section includes a synthesis chapter from an expert in the field to bring to the fore potential implications as well as new questions raised by the analyses Finally a culminating section considers the use of each conception across grade bands and data sets Curriculum Development Library, 1980 **Interagency Training**
