Agricultural Research for Sustainable Food Systems in Sri Lanka Ranjith Premalal De Silva,Gamini Pushpakumara,Pahan Prasada,Jeevika Weerahewa,2020-10-06 Food systems involve a range of activities concerning food production processing distribution marketing and trade preparation consumption and disposal They encompass the path of food from the farm to the dinner table meeting the food and

nutritional needs of a nation When such systems do so without sacrificing the needs of future generations they are referred to as Sustainable Food Systems The natural and physical environment infrastructure institutions society and culture and policies and regulations within which they operate as well as the technologies they adopt shape these systems outcomes Making food systems more sustainable is a key priority for all nations and Sri Lanka is no exception Food systems deliver optimal performance when the policy and regulatory environment is conducive institutions are supportive and a combination of agricultural research investments and an efficient extension system generates the technologies and scientific evidence required for sound policymaking and agenda setting Further agricultural research can generate essential findings technologies and policies for sustainable agricultural development across disciplines sectors and stakeholder groups This book shares valuable insights into research conducted in the broad food and agriculture sectors in Sri Lanka It also discusses the status quo in related disciplines and outlines future research directions Accordingly it offers a valuable source of reference material for researchers students and stakeholders in the food and agriculture sectors while also highlighting the types of support that policymakers and other decision makers can provide

Emotion and Adaptation Richard S. Lazarus, 1994-06-09 In this landmark work Richard Lazarus one of the world's foremost authorities offers a comprehensive treatment of the psychology of emotion its role in adaptation and the issues that must be addressed to understand it The work provides a complete theory of emotional processes explaining how different emotions are elicited and expressed and how the emotional range of individuals develops over their lifetime The author's approach puts emotion in a central role as a complex patterned organic reaction to both daily events and long term efforts on the part of the individual to survive flourish and achieve In his view emotions cannot be divorced from other functions whether biological social or cognitive and express the intimate personal meaning of what individuals experience As coping and adapting processes they are seen as part of the ongoing effort to monitor changes stimuli and stresses arising from the environment After defining emotion and discussing issues of classification and measurement Lazarus turns to the topics of motivation cognition and causality as key concepts in this theory Next he looks at individual emotions both negative and positive and examines their development in terms of social influences and individual events Finally he considers the long term consequences of emotion on physical health and well being and the treatment and prevention of emotional dysfunction The book draws together the relevant research from a wide variety of sources and distills the author's pioneering work in the field over the last forty years As a comprehensive treatment of the emotions the book will interest students clinicians and researchers involved in personality social and clinical psychology as well as cognitive and developmental psychology It may also be used as a supplemental textbook in courses on the psychology of adjustment emotion and feeling

Descriptive Adaptation Studies Patrick Cattrysse , 2014-02-18 It is common practice nowadays for adaptation critics to denounce the lack of meta theoretical thinking in adaptation studies and to plead for a study of adaptation as adaptation one that eschews value judgments steps beyond normative fidelity based

discourse examines adaptation from an intertextual perspective and abandons the single source model for a multiple source model. This study looks into a research program that does all that and more. It was developed in the late 1980s and presented in the early 1990s as a polysystem PS study of adaptations. Since then the PS label has been replaced with descriptive. This book studies the question of whether and how a PS approach could evolve into a descriptive adaptation studies DAS approach. Although not perfect, no method is. DAS offers a number of assets. Apart from dealing with the above mentioned issues, DAS transcends an Auteurist approach and looks at explanation beyond the level of individual agency even if contextualized. As an alternative to the endless accumulation of ad hoc case studies, it suggests corpus based research into wider trends of adaptational behavior and the roles and functions of sets of adaptations. DAS also allows reflection upon its own epistemic values. It sheds new light on some old issues. How can one define adaptation? What does it mean to study adaptation as adaptation? Is equivalence still possible and is the concept still relevant? DAS also tackles some deeper epistemological issues. How can phenomena be compared? Why would difference be more real than sameness or change more real than stasis? How does description relate to evaluation, explanation and prediction etc? This book addresses both theory minded scholars who are interested in epistemological reflection and practice oriented adaptation students who want to get started. From a theoretical point of view, it discusses arguments that could support the legitimacy of adaptation studies as an academic discipline. From a practical point of view, it explains in general terms ways of conducting an adaptation study. Patrick Catrysse's work is of utmost importance to Adaptation Studies. As the first extended attempt to develop a rigorous methodology which borrows in very meaningful ways from Adaptation Studies' cousin Translation Studies, this book should be on every Adaptation scholar's shelf. While Hutcheon's, Sanders and Leitch to name but a few, have laid the groundwork which allowed Adaptation Studies to establish itself as a field of inquiry in its own right, Catrysse moves the field into the next necessary stage: that of developing conceptual tools which stand the test of critical investigation and allow Adaptation Studies to move beyond the single case study approach. Katja Krebs, University of Bristol. This book is a bold initiative; it proposes and illustrates a comprehensive new empirical research programme for film adaptation studies inspired by the way systems theory and norm theory have expanded Translation Studies. One of the book's unusual strengths is the way the proposal is grounded in a thoughtful theoretical discussion of conceptual and methodological issues dealing with such notions as theory, descriptivism, definition, diachrony and explanation. This gives the work a significance that ranges well beyond Adaptation Studies alone; it deserves the attention of scholars in the humanities in general. Andrew Chesterman, University of Helsinki. This dense and theoretically informed study argues forcefully for a descriptive systems analysis approach to literature film adaptation, building on the author's earlier corpus based study of film noir and adaptation. Providing a wide ranging discussion of important critical questions including the place of logical positivism in humanistic studies, this book will give adaptation scholars much to think about. Well written, carefully organized and consistently persuasive. DESCRIPTIVE

The Foreign Policies of Eastern Europe: Domestic and International Determinants J.A. Kuhlman, 2024-12-09 *Redefining Adaptation Studies* Dennis

Cutchins, Laurence Raw, James M. Welsh, 2010-02-23 Since films were first produced adapted works have predominantly borrowed primarily from traditional texts such as novels and plays Likewise the study of film adaptations has also been fairly traditional rarely venturing beyond a comparison of the source material to its often less revered counterpart Redefining Adaptation Studies breaks new ground in showing the range of possibilities that transcend the literature film paradigm These essays focus on the idea of adaptation and what it means in different socio political contexts Above all this collection shows how cultural and political factors determine the meaning of the term and its potential for developing new approaches to learning The contributors to this volume look at adaptation in different contexts and develop new ways to approach adaptation not just as a literature through film issue but as something which can be used to develop other skills such as creative writing and personal and social skills Aimed at teachers in high schools and universities at the under and postgraduate levels this volume not only suggests how adaptation might be used in different disciplines but how it might improve the learning experience for teachers and students alike *User Modeling, Adaptation and Personalization*

Buddhism Phil Henry, 2013-08-29 In recent years there has been a growing academic acknowledgment around the world of a contemporary Buddhist phenomenon described as Engaged or Socially Engaged Buddhism SEB It is a contested phenomenon variously associated with finding Buddhist solutions for social political and ecological problems The debate about its origins practice and legitimacy has stirred academics and practitioners alike Firstly does such an approach to Buddhist practice constitute a departure with the past in which case a new expression of an ancient practice is being experienced all around us Or is this really a continuity of practice adapted to inform current understanding given that some would describe Buddhism as always having been engaged Adaptation and Developments in Western Buddhism examines the UK Socially Engaged Buddhist experience captured through a series of five case studies of Buddhist groups and a survey undertaken over two years in the field The volume is a ground breaking and benchmark analysis of Socially Engaged

Buddhism in the UK drawing for the first time on evidence from practitioner s experiences with which to characterise the previously dichotomous academic debate Ultimately the volume locates Socially Engaged Buddhism in the UK and places it within the broader and global context of an emerging Western Buddhism characterising the phenomenon and its relationships to the wider Buddhist world Beyond Embodied Cognition: Intentionality, Affordance, and Environmental Adaptation Zheng Jin,Maurizio Tirassa,Anna M. Man in Adaptation Yehudi A. Cohen,2022-04-19 Underlying the anthropological study of man is the principle that there is a reality to which man must adapt if he is to survive Reproduce and to perpetuate himself Populations must adapt to the realities of the physical world and maintain a proper fit between their biological makeup and the pressures of the various niches of the world in which they seek to live Social groups where culture is found must develop adaptive mechanisms in the organization of their social relations if there is to be order regularity and predictability in patterns of cooperation and competition and if they are to survive as viable units This three volume set of readings presents an introduction to anthropology that is unified and made systematic by focus on adaptations that have accompanied the evolution of man from non human primate to inhabitant of vast urban areas in modern industrial societies Man in Adaptation The Cultural Present introduces Cultural Anthropology also from the point of view of adaptation and provides coherence for the study of human societies from man s social beginnings to the present The book deals sequentially with the more and more complex technologies and political and social structures that have enabled different societies to make effective use of the energy potentials in their habitats This and the two companion volumes are the first attempt to unify the disparate subject matter of anthropology within a single and powerful explanatory framework They incorporate the work of the most renowned anthropological experts on man and they illuminate clearly one of the most important concepts around which one can build an investigation of the nature and scope of anthropology itself For these reasons they are recognized as indispensable reading for every professional anthropologist and as perhaps the best available means of introducing new students to the field **Attachment in Religion and Spirituality** Pehr Granqvist,2020-01-21
