H. Hui, Frank Sherkat, 2005-12-19 Advances in food science technology and engineering are occurring at such a rapid rate that obtaining current detailed information is challenging at best While almost everyone engaged in these disciplines has accumulated a vast variety of data over time an organized comprehensive resource containing this data would be invaluable to have The Building and Solving Mathematical Programming Models in Engineering and Science Enrique Castillo, Antonio J. Conejo, Pablo Pedregal, Ricardo García, Natalia Alguacil, 2011-10-24 Fundamental concepts of mathematical modeling Modeling is one of the most effective commonly used tools in engineering and the applied sciences In this book the authors deal with mathematical programming models both linear and nonlinear and across a wide range of practical applications Whereas other books concentrate on standard methods of analysis the authors focus on the power of modeling methods for solving practical problems clearly showing the connection between physical and mathematical realities while also describing and exploring the main concepts and tools at work This highly computational coverage includes Discussion and implementation of the GAMS programming system Unique coverage of compatibility Illustrative examples that showcase the connection between model and reality Practical problems covering a wide range of scientific disciplines as well as hundreds of examples and end of chapter exercises Real world applications to probability and statistics electrical engineering transportation systems and more Building and Solving Mathematical Programming Models in Engineering and Science is practically suited for use as a professional reference for mathematicians engineers and applied or industrial scientists while also tutorial and illustrative enough for advanced students in mathematics or engineering **Technical Note** ,1921 **International Review of the Science and Practice of Agriculture** ,1918 **Addison-Wesley Science Insights** ,1996 **Technology and the American Economy** United States.
