invertebrate phyla but also similar processing principles of complex stimuli between different sensory modalities The chapters show that the extraction of behaviourally relevant signals from all environmental stimuli as well as the detection of low intensity signals and the analysis of temporal features can be similar across sensory modalities including olfaction vision mechanoreception and heat perception **Popular Science** ,1988-12 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Popular Science** ,1967 *Digest of Technical Papers* ,1988 **Colliery Guardian, and Journal of the Coal and Iron Trades** ,1922
