remarkable that SDL 97 may have the first participant younger than SDL itself SDL 97 provides the opportunity to reflect the
course SDL has taken and why it has been successful over two decades where other languages addressing the same market
have failed SDL now also has a permanent companion in MSC Message Sequence Charts MSC today is a language in its own
right and has its areas of application both in conjunction with SDL and independently or in combination with other
techniques MSC has strong structuring concepts to specify message sequences for large systems and can be used to develop
scenarios which is extremely useful for test and design environments The SDL Forum today really is the SDL and MSC Forum
