Dictionary of British Education Professor Peter Gordon, Peter Gordon, Professor Denis Lawton, Denis

Lawton, 2004-08-02 This is an up to date guide for teachers and parents administrators governors students and others to help the find their way about the increasingly complex world of education The main section provides a dictionary that is more than a simple set of definitions many words in education have been put into some kind of historical context to become fully meaningful The second part gives some important landmarks from the nineteenth century to the present time and also provides a list of political heads of education since state education was established The final section is devoted to a list of acronyms and abbreviations both of which have been the subject of multiple definitions in recent years **Teacher**

Education in Transition John Furlong, 2000 The 1990s were a period of quite dramatic change for initial teacher education in England and Wales with wave after wave of Government sponsored reforms The changes introduced were highly controversial as those in higher education who were traditionally responsible for teacher education felt marginalized many believed that what was at stake in these reforms was the nature of teacher professionalism itself It was against this background of policy change and political ferment that the Economic and Social Research Council funded two successive research projects to evaluate the consequences of the reforms The projects known as MOTE Modes of Teacher Education included two national surveys as well as more detailed case studies of particular courses In this volume the authors draw upon these two major studies as well as more recent policy analysis to give a fascinating overview of the impact of policy change throughout the 1990s In doing so they also consider whether a new form of professionalism was indeed created

The Death of Progressive Education Roy Lowe,2007-08-07 The first authoritative survey of the changing politics of the classroom since the Second World War It charts the process by which society moved away from being one in which teachers decided both the content of the school curriculum and how it would be taught towards the present situation in which a host of external influences dictate the nature of the educational experience The book identifies the key social and political developments which made this transformation inevitable and at the same time raises the question of how far the loss of control by teachers has also meant a shift away from progressive child centred education Key issues covered include The post war debate on the school curriculum as well as the extent to which it was fiercely contested The Black Paper Movement of the early 1970s The ways in which radical right rhetoric has come to dominate the politics of education and the educational press How the term progressive education has been subtly reworked so that those claiming to reform education now focus on measurable outcomes and the answerability of schools to parental and government pressure An historical analysis of the ways in which the Thatcher revolution in schools has been taken forward and developed under both John Major and Tony Blair This ground breaking analysis of how we have arrived at the present situation in our schools will be of interest to all students of education and to all those who wish to learn more about the changes that have taken place in our education system over the past sixty years It helps us understand why they happened and in so doing raises profound questions about the aspirations of modern society and the role of the schools in shaping it **Early Years** ,1976 **The Times Index** ,2000 Indexes the Times and its supplements **The Initial Teaching Alphabet** John A.
