Life-Oriented Behavioral Research for Urban Policy Junyi

Zhang,2017-01-03 This book presents a life oriented approach which is an interdisciplinary methodology proposed for cross sectoral urban policy decisions such as transport health and energy policies Improving people s quality of life QOL is one of the common goals of various urban policies on the one hand while QOL is closely linked with a variety of life choices on the other The life oriented approach argues that life choices in different domains e g residence neighborhood health education work family life leisure and recreation finance and travel behavior are not independent of one another and ignorance of and inability to understand interdependent life choices may result in a failure of consensus building for policy decisions The book provides evidence about behavioral interdependencies among life domains based on both extensive literature reviews and case studies covering a broad set of life choices This work further illustrates interbehavioral analysis frameworks with respect to various life domains along with a rich set of future research directions This book deals with life choices in a relatively general way Thus it can serve not only as a reference for research but also as a textbook for teaching and learning in varied behavior related disciplines *List of Additions, with Notes* Free Public Library (Worcester, Mass.),1878
