In the current era, almost every organization would like to select and have highly motivated and workaholic employees to obtain high productivity and reputation in the competitive world but truly somewhere they are lacking in understanding what really leads people motivated towards work. However, organizations could be progressively effective if the representatives had invested enthusiasm for the fate of the organization. Moreover, it's very essential to consider all the needs and drives must be met either individuals or workplace especially for an employee to succeed at the workstation.

By writing this motivation paper I will come up with various motivation theory along with some experience regarding motivational situations what I felt including how motivational theories are applicable to the working environment, and how businesses can actualize the hypotheses to guarantee upbeat and spurred representatives.

Additionally, the most important theories will be Maslow's hierarchy of needs, Herzberg's two-factor theory, and manifold motivation approaches that will help for better understanding for managers how employees get self-motivated and work supremely for the best. The Effects of Intrinsic and Extrinsic Motivation on Work Performance* Jan U., 2021-07-21 Seminar paper from the year 2018 in the subject Leadership and Human Resources Employee Motivation Employee Satisfaction grade 1 3 University of Mannheim language English abstract The purpose of this paper is to investigate the effects of intrinsic and extrinsic motivation on work performance within the R D environment and provide practical recommendations Substantial research has been conducted to investigate the construct of motivation and to validate its impact on core business outcomes within varying environments According to Rani and Lenka 2012 the motivational process affects an individual s strength and persistence of behaviour Thus motivated individuals are activated to behave in a more creative productive and persistent way Prevailing literature validates this positive effect For example Deci and Ryan 2008a argue that there is a significant link between motivation and positive work related outcomes such as psychological well being and work performance Considering this convincing evidence further research tried to investigate this relationship within varying settings An area that has aroused major attention is the R D environment Within this context managers face several obstacles in establishing high levels of motivation Clarke 2002 mentions for example the differing values and expectations of R D specialists the uncertainty of outcomes and the difficulty in measuring the results For high levels of motivation and performance to occur managers need to respond to the needs of the R D professionals without losing sight of the company s major objectives Based on the work of Deci Vallerand Pelletier and Ryan 1991 and their distinction between intrinsic and extrinsic motivation studies in the R D management literature validate the importance of both motivational constructs within this context However in practice organizations like BMW may be incentivized to primarily focus on extrinsic rewards Extrinsic incentive systems such as salary increases or bonuses can easily be established fairly measured and provide a clear link between the employees monetary motives and the organizations objectives Further intrinsic motivation may be neglected due to difficulties and increased efforts of implementing such incentives As a result of this neglect of their workers intrinsic needs and desires the motivation within the R D department and in turn the work performance may decline

*Work Motivation* Andrzej Z.
