Fischer,Berthold Traub,2019-09-24 The Swiss National Forest Inventory NFI is a forest survey on national level which started
in 1982 and has already reached its 5th survey cycle NFI5 It can be characterized as a multisource and multipurpose
inventory where information is mainly collected from terrestrial field surveys using permanent sample plots In addition data
from aerial photography GIS and forest service questionnaires are also included The NFI s main objective is to provide
statistically reliable and sound figures to stakeholders such as politicians researchers ecologists forest service timber
industry national and international organizations as well as to international projects such as the Forest Resources
Assessment of the United Nations For Switzerland NFI results are typically reported on national and regional level State of
the art methods are applied in all fields of data collection which have been proven to be of international interest and have
even served as a basis for other European NFIs The presented methods are applicable to any sample based forest inventory
around the globe In 2001 the Swiss NFI published its methods for the first time Since then many methodological changes and
improvements have been introduced This book describes the complete set of methods and revisions since NFI2 It covers
various topics ranging from inventory design and statistics to remote sensing field survey methods and modelling It also
describes data quality concepts and the software framework used for data storage statistical analysis and result presentation
