the need for a comprehensive understanding of this interaction given the sector's massive economic influence and the extensive investment required. The need for an in-depth exploration of this liaison has never been more pressing. Strategic Management and Policy in the Global Aviation Industry offers an insightful and comprehensive solution to this enigmatic issue. This book delves into the dynamics of the aviation sector's reliance on government intervention and support, providing invaluable perspectives for academic scholars and industry enthusiasts. It explores the critical role governments play in the development and sustainability of aviation companies, especially in the wake of the pandemic where governments worldwide stepped in to bolster their national aviation companies. Additionally, the book explores the industry's efforts to align with the United Nations sustainability targets and the critical influence of government regulations in achieving these goals. It also dissects the digital transformation and the integration of innovative technologies in aviation, setting the stage for a more efficient and innovative industry. Furthermore, it unveils the burgeoning role of artificial intelligence in the quest for cost reduction and enhanced operational efficiency in the fiercely competitive aviation market.

Civil Airliner Flight Guidance Technology for Four-Dimensional Trajectory-Based Operation Guangwen Li, Shaobo Zhai, Qiuling Jia, 2024-09-16. This book focuses on achieving precision guidance and timely arrival in flight. The content comprehensively describes the civil aircraft flight guidance technology for four-dimensional trajectory-based operation. The main content of this book is the summary of the author's team's research work on flight management systems and flight guidance technology over the past decade, including flight plan analysis and transition path construction, four-dimensional trajectory planning and re-planning, high-precision flight guidance commands calculation, FMS landing system, etc. The theoretical methods described in the book have been verified by pre-research and practical engineering projects, which are of great theoretical significance and engineering application value. This book is used as a reference for engineers engaged in flight control, flight guidance, and flight management research, as well as Masters and Ph.Ds in related disciplines.

Aviation Industry Risk Analysis in Epidemics Bharat Mishra, 2024-12-15. Aviation Industry Risk Analysis in Epidemics examines how the COVID-19 pandemic has transformed our lives, especially in terms of transportation. If you're keen to understand how airlines operate during pandemics, this book is for you. Following IATA guidelines and top aviation strategies, we outline methods and strategies to enhance your understanding of aviation in pandemic times. Even if you're new to aviation or pandemic concepts, we explain everything from the basics, covering how they are regulated and managed. We explore how airlines handle far-off transportation during pandemics, whether for personal business or tourism purposes. The book also provides tactics for adhering to pandemic regulations and improving aviation activities during such times. Questions like what aviation and pandemics entail, decision making in aviation, prevention guidelines, and ensuring safety while traveling during pandemics are thoroughly answered. This book introduces a range of methods, technologies, and tools in aviation aiming to prevent the spread of pandemics. Suitable for novices and experts, leaders and followers, aviation professionals or enthusiasts looking to
