

Part 2: Understanding the Events of the Cardiac Cycle

The Cardiac Cycle shows the mechanical events of the heart, in order. Read through the phases of the Cardiac Cycle, starting with #1. Imagine where the blood is and where the blood is going. Then answer the following questions, using the figure only.

1. What do the black arrows used in this diagram represent? _____
2. In which phase does blood enter the ventricles? # _____
3. During which phase is blood moving OUT of the ventricles? # _____
4. What does the word "systole" mean? _____
5. Which two phases are part of ventricular systole? # _____ and # _____
6. What is the difference between the two phases of ventricular systole? _____
7. This is called the Cardiac Cycle because the events repeat. Any phase could be labeled as phase #1. If you were to choose which phase to call #1, which one would you choose, and why?

Introduction to Anatomy & Physiology Teacher Guide Dr Tommy Mitchell, 2016-07-25 Volume One The Musculoskeletal System opens with the building blocks of your body the cells Your body is built from many kinds of cells and tissues and you will learn how they work Even the bones and muscles that give you strength and speed depend on many types of cells This book will Show you the ins and outs of the bones in your skeleton and how they function Give detail as to how your marvelous muscles move you Provide a detailed glossary in the back for quick reference Throughout the book you will learn things to do to keep your body healthy But in a fallen cursed world things are bound to go wrong We will look at what happens when disease or injury affects bones and muscles Volume Two Cardiovascular and Respiratory Systems From the level of the cell to the organs themselves we will examine these systems in depth Here you will learn The incredible design of the human heart and how it is really two pumps in one How blood moves through an incredible network of arteries and veins What blood

pressure is and the marvelous systems that help regulate it. How the respiratory system allows us to get the bad air out and the good air in. Along the way we will see what happens when things go wrong. We will also suggest things to do to keep the heart and lungs healthy. Although the world insists that our bodies are merely the result of time and chance as you examine the human body closely you will see that it cannot be an accident. It can only be the product of a Master Designer.

Cardiovascular Physiology Concept Hannah Ramirez, 2020-08-23 Cardiovascular Physiology Concept Short Book Description An Introduction to Cardiovascular Physiology provides the student with the key concepts of cardiovascular physiology Cardiovascular Physiology Questions for Self Assessment With Illustrated Answers Cardiovascular Physiology Concept full Book Description Overview of the cardiovascular system The cardiac cycle Cardiac myocyte excitation and contraction Initiation and nervous control of heart beat Electrocardiography and arrhythmias Control of stroke volume and cardiac output Assessment of cardiac output and peripheral pulse Haemodynamics flow pressure and resistance The endothelial cell The microcirculation and solute exchange Circulation of fluid between plasma interstitium and lymph Vascular smooth muscle excitation contraction and relaxation Control of blood vessels I Intrinsic control Control of blood vessels II Extrinsic control by nerves and hormones Specialization in individual circulations Cardiovascular receptors reflexes and central control Coordinated cardiovascular responses Cardiovascular responses in pathological situations The aim of this collection of over 230 questions is to offer students an element of self assessment as they progress through the companion book or revise for examinations Lecturers may find some of the questions useful as a template when setting questions of their own but should note that the questions are primarily educational in intent their discriminatory power has not been tested The questions are grouped under the same headings as the chapters of the companion textbook so they become progressively more advanced see Contents Occasional statements call for information from later chapters Medically relevant questions are introduced wherever they are appropriate I have set at least one question on each learning objective given at the start of the chapter in the companion volume to help you assess your achievement of the learning objectives Some questions require you to integrate information from other chapters too The questions aim to test basic understanding fundamental principles and medical relevance Hopefully they avoid excessive detail always the examiner's easy option The questions Most of the questions are multiple choice questions MCQs generally with five true false statements but occasionally more or less than five Although some educationalists now demand single correct answer questions SAQs one correct answer out of four or five options these test less knowledge so the MCQ style has been retained here To add variety there is a sprinkling of other styles of question such as extended matching questions i.e. choose the best answer from a list data interpretation problems and little numerical problems that test reasoning power and ability to do simple calculations The answers Each answer is accompanied by a brief explanation and very often an illustrative figure which should help if you got the answer wrong Most of the figures are from the accompanying textbook but there are also new explanatory diagrams

after some questions It is sometimes difficult to avoid ambiguity in MCQ questions so use your common sense choose the answer that will be right most of the time rather than a remote rare possibility Nevertheless if you disagree with the official answer do let me know *Cardiac Cycle V. Cardiac Output* University of Natal. Faculty of Medicine,198? **Changes in Total Cardiac Volume Through-out the Cardiac Cycle** Panagiotis Constantinou Voukydis,1969 **Cardiac Cycle Phase, Reaction Time and Event-related Potentials** ,1987 **The Relation of Startle Reactions to the Cardiac Cycle** Carney Landis,Theodore Watson Forbes,1934 **Physiology of the Heart - Quick Review Notes and Outline** E Staff, Physiology of the Heart Quick Review Notes and Outline Learn and review on the go Use Quick Review Physiology Notes to help you learn or brush up on the subject quickly You can use the review notes as a reference to understand the subject better and improve your grades Easy to remember facts to help you perform better Perfect study notes for all high school and college students *Cardiac Cycle* P. Canfield,1976 *The Four Diastoles* Eduardo Césarman,1989*
