The Indigo Children Beth Singler, 2017-09-18 The Indigo Child concept is a contemporary New Age redefinition of self Indigo Children are described in their primary literature as a spiritually psychically and genetically advanced generation Born from the early 1980s the Indigo Children are thought to be here to

usher in a new golden age by changing the world's current social paradigm. However, as they are paradigm busters, they also claim to find it difficult to fit into contemporary society. Indigo Children recount difficult childhoods and school years, and the concept has also been used by members of the community to reinterpret conditions such as Attention Deficit Hyperactive Disorder (ADHD) and autism. Cynics, however, can claim that the Indigo Child concept is an example of special snowflake syndrome, and parodies abound. This book is the fullest introduction to the Indigo Child concept to date. Employing both on and offline ethnographic methods, Beth Singler objectively considers the place of the Indigo Children in contemporary debates around religious identity, self-creation, online participation, conspiracy theories, race, and culture, and definitions of the New Age movement.

End Times Bryan Walsh, 2019-08-27. In this history of extinction and existential risk, a Newsweek and Bloomberg popular science and investigative journalist examines our most dangerous mistakes and explores how we can protect and future-proof our civilization. *End Times* is a compelling work of skilled reportage that peels back the layers of complexity around the unthinkable and inevitable end of humankind. From asteroids and artificial intelligence to volcanic supereruption to nuclear war, veteran science reporter and TIME editor Bryan Walsh provides a stunning panoramic view of the most catastrophic threats to the human race. In *End Times*, Walsh examines threats that emerge from nature and those of our own making: asteroids, supervolcanoes, nuclear war, climate change, disease, pandemics, biotechnology, artificial intelligence, and extraterrestrial intelligence. Walsh details the true probability of these world-ending catastrophes, the impact on our lives were they to happen, and the best strategies for saving ourselves, all pulled from his rigorous and deeply thoughtful reporting and research. Walsh goes into the room with the men and women whose job it is to imagine the unimaginable. He includes interviews with those on the front lines of prevention, actively working to head off existential threats in biotechnology labs and government hubs. Guided by Walsh's evocative, page-turning prose, we follow scientific stars like the asteroid hunters at NASA and the disease detectives on the trail of the next killer virus. Walsh explores the danger of apocalypse in all forms. In the end, it will be the depth of our knowledge, the height of our imagination, and our sheer will to survive that will decide the future.

American Roadkill Don H. Corrigan, 2021-10-25. Slaughtered along our highways, roadkill may be observed regularly but isn't likely to be given much thought. Research scientists, animal rights activists, roadkill artists, writers, ethicists, and lyricists, however, are increasingly sounding the alarm. They report that we are killing the very animals we love and are driving many of them to the brink of extinction. Detailing the death and destruction of mammals, reptiles, amphibians, and insect pollinators, this study examines the ways in which we are thus jeopardizing our own futures. Beginning in the Model T era, biologists counted the common carnage of the time: cottontails, woodchucks, and squirrels, mostly. That record-keeping continues today. Beyond the bleak statistics, zoologists are rerouting migratory paths of animals and are advocating for cat and dog companions. This book illuminates both our successes and failures in keeping animals out of harm's way and what those efforts reflect about ourselves and our capacity to care enough to alter the road ahead.
