Instructor's manual Edward Bradford Titchener, 1905 The general purpose with which this book has been written is sufficiently indicated by its title I have selected a number of the classical experiments of Experimental Psychology and have tried to present them in such a way that their performance shall have a real disciplinary value for the undergraduate student Within this general purpose my aim has been two fold I have sought to show in the first place that psychology is above the laboratory that we employ our instruments of precision not for their own sake but solely because they help us to a refined and more accurate introspection And secondly just as in my Outline of Psychology and Primer of Psychology I gave the results of experimentation a prominent place in the psychological system so here I have treated the selected experiments not as separate exercises but as points of departure for systematic discussion PsycINFO Database Record c 2005 APA all rights reserved *Quantitative experiments: pt. 1.
