As described in the cover memo, a group of CMER members has been working for over a year in response to TFW Policy's motion to review the Washington Farm Forestry Association (WFFA)-sponsored SFLO Template Scientific Justification (SJ) and supporting documents (See attached CMER cover memo). CMER was given three documents by Policy, including the SJ, a review of this document by Mark Teply of Cramer Sciences (hereafter, Teply review), and an ISPR assessment of the Teply review (hereafter, ISPR review). The group made a good faith effort to come to a mutually acceptable agreement on the scientific merits, assessment and interpretation of information provided by the SJ, the Teply review of the SJ, and the ISPR review of the Teply review. Despite these efforts, we could not agree on many of the substantive issues.

CMER members were not able to come to consensus on how to use the information in the Teply review to answer questions 4a and 4b in the CMER Answers to 6 Questions document. Group members found that the Teply review contained contradictory information, and it was not clear to some group members the extent to which ISPR comments addressed the science in the SJ or in Teply's review of that science. There was no opportunity for group members to discuss these issues with Teply or with the ISPR reviewers, and ultimately the full group was not able to come to agreement on how to interpret the various findings. As a result, CMER members found it difficult to engage in substantive discussions on the technical merits of the SFLO prescriptions based on Teply's review of those prescriptions. Additional attempts to come to a mutual agreement about an overall understanding of the context and utility of the information provided were also unsuccessful. Ultimately, these factors prevented resolution of disagreements regarding what the SJ and supporting documents told us and did not tell us about the proposed SFLO riparian buffer prescriptions.

The following is a summary of the large-scale issues that were seen by the CMER participants listed above as obstacles to consensus regarding a technical summary of the information. These include issues with the (1) type of documents provided, (2) the uncertainty of assessments within the SJ, (3) the scope of inference needed to reach a defensible conclusion, and (4) the role that newer data might have played if it had been used to update the document during the seven years since the SFLO Template Proposal was originally submitted to Policy for review.

Documents

The SJ was written based on a limited literature review and contained an un-validated, modeled analysis of shade. Neither un-validated models nor limited literature reviews meet the scientific merits for considering non-CMER science in the AMP (Use of Non-CMER Science in the Forest Practices Adaptive Management Program, 2013).

The SFLO template proposal did not follow CMER's project development, literature review, scoping, best available science, alternatives analysis or QA/QC process outlined in the CMER Protocols and Standards Manual and referenced in DNR's adaptive management board manual (Section 22). Additionally, the author never revised his report in response to the Teply review.
