Rice-maize systems in Asia: current situation and potential, 2011 Rice maize R M cropping systems have emerged in recent years on 3.5 million hectares in Asia in response to the increasing demand from a rapidly expanding human population for rice and livestock products They are rapidly spreading in southern and northeastern India and Bangladesh driven by the rising demand for maize by the poultry and fish sectors and the tightening world export import markets The recent development of short duration rice varieties and maize hybrids with improved drought tolerance is also providing opportunities for the expansion of R M systems into areas of South Asia with insufficient irrigation or rain for continuous rice cultivation Agroecologically R M systems have the potential to expand into broad climatic zones across Asia Because strong economic multipliers exist between food production and feed and livestock production more diversified cropping systems are also likely to become a key engine for economic growth in rural areas of Asia This will contribute to more diversified diets improved human nutrition reduced poverty and greater investment in other aspects of quality of life such as education and health care R M systems will also provide new business opportunities for the local agribusiness sector including hybrid seed production and marketing the

fertilizer sector the agricultural machinery sector and the grain marketing and livestock feed processing sector Recognizing the importance of diversifying cropping systems in Asia and the need for system level research to support new opportunities for agricultural development IRRI and CIMMYT scientists in collaboration with NARES partners have recently begun work on R M systems in many countries of Asia This report contains information on a strategic assessment of R M systems for 29 selected sites representing diverse soils climate and agroecosystems across nine countries in Asia Bangladesh China India Indonesia Nepal Pakistan the Philippines Thailand and Vietnam Conducted jointly by IRRI and CIMMYT the process involves regional and site level biophysical assessment supported by socioeconomic evaluation using economic data at the regional level and some microeconomic data Biophysical assessment includes agroecosystem characterization of R M systems analysis of historical daily climatic data and regional level prediction of yield potential for the 29 sites The study then provides a detailed analysis of 10 selected sites to understand existing cropping systems identify alternative potential systems and explore measures to optimize these The Cereal Systems Initiative for South Asia CSISA a project funded by the Gates Foundation and USAID in Bangladesh India Nepal and Pakistan was launched in early 2009 It now provides an overall strategy and a new umbrella for contributing new science and technologies to accelerate short and long term cereal production growth in South Asia s most important grain baskets It builds on technologies developed and lessons learned from the Rice Wheat Consortium RWC and many other investments in agricultural R D by both the public and private sector Through creating and facilitating innovative and effective public private sector partnerships in key hubs in South Asia CSISA will boost the deployment of existing varieties hybrids crop and aquaculture related management technologies and market information The results from the strategic assessment of R M systems are already being used in several CSISA hubs

Key Problems of Sociological Theory John Rex,2006-04-07 This is Volume of VII twenty two on a series on Social Theory and Methodology Originally published in 1961 this book was written because of the author s sense of the inadequacies of a sociological tradition dominated by empiricism and positivism The tradition of empiricism leads to attempts to settle public issues by reference to crude ad hoc generalisations So right wing facts are refuted by left wing facts and vice versa and in the argument which ensues nothing becomes clear except the value biases which the authors seek desperately to conceal The tradition of positivism on the other hand fails in refusing to interpret observed correlations of fact except in terms of the natural sciences So the sociologist often appears to have derived little more insight through his precise methods than the untutored layman is able to do through trusting to intuition and common sense

Key Technology Challenges of Electric Ducted Fan Propulsion Systems for eVTOL Yuping Qian,Yangjun Zhang,WEILIN ZHUGE,2023-11-22 Electrical vertical takeoff and landing eVTOL vehicles for urban air mobility UAM are garnering increased attention from both the automotive and aerospace industries with use cases ranging from individual transportation public service cargo delivery and more Distributed electric propulsion systems are their main

technical feature they determine vehicle size and propulsion efficiency and provide distributed thrust to achieve attitude control Considering the intended role of eVTOL vehicles ducted fan systems are ideal choice for the propulsor as the duct provides a physical barrier between the rotating blades and the human especially during the take off and landing phases Key Technology Challenges of Electric Ducted Fan Propulsion Systems for eVTOL introduces the main bottlenecks and key enablers of ducted fan propulsion systems for eVTOL applications Based on the introduction and discussion of these important issues this report will help eVTOL engineers understand the key technical issues and inspire them to develop the ideal solutions that will enable eVTOL vehicle deployment for UAM operations Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2023027>

Automation and Instrumentation for Power Plants M. Ecosystems and Human Well-Being Neville Ash, 2010-04-05 The Millennium Ecosystem Assessment MA is the most extensive study ever of the linkages between the world s ecosystems and human well being It is one of the most important conservation initiatives ever undertaken and the ecosystem services paradigm on which it is based provides the standard for practice This manual supplies the specific tools that practitioners of the paradigm need in order to extend their work into the future The manual is a stand alone how to guide to conducting assessments of the impacts on humans of ecosystem changes It builds on the experiences and lessons learned from the MA global and sub global

assessment initiatives with chapters written by well known participants in those initiatives It also includes insights gained from service focused assessment activities since the completion of the MA in 2005 Integrating Human Factors Methods and Systems Thinking for Transport Analysis and Design Gemma J. M. Read, Vanessa Beanland, Michael G. Lenné, Neville A. Stanton, Paul M. Salmon, 2017-07-26 Governments and road safety agencies around the world have either introduced or are considering safe system strategies a long overdue acknowledgement that different elements of the road system contribute to road safety outcomes Human factors approaches have a leading role here in both conceptualising the road system as a complex sociotechnical system and in providing practical approaches to support true systems based countermeasures This book illustrates the potential for integrating contemporary systems based human factors methods with modern day driving assessment methods such as vehicle instrumentation and driving simulation to understand and enhance performance in modern day road transport systems The book outlines why a fundamental paradigm shift is needed in the way these systems are designed and operated and illustrates how a wide range of accepted human factors approaches can be applied successfully to road transport to revolutionise the countermeasure design process The practical illustrations of these human factors methods are applied to a long standing road and rail safety issue rail level crossings where the road and rail systems intersect The final chapter of the book highlights the utility of the human factors approach to reducing road trauma and discusses future applications of the approach **The Shock and Vibration Digest**, 1984 Data Management in Grid and Peer-to-Peer Systems Abdelkader Hameurlain, A Min Tjoa, 2009-08-24 The synergy and convergence of research on grid computing and peer to peer P2P computing have materialized in the meeting of the two research communities parallel systems and distributed systems The main common objective is to harness Internet connected resources e g CPU memory network bandwidth data sources at very large scale In this framework the Globe Conference tries to consolidate the bidirectional bridge between grid and P2P systems and large scale heterogeneous distributed database systems Today the grid and P2P systems hold a more and more important position in the landscape of the research in large scale distributed systems and the applications which require an effective management of voluminous distributed and heterogeneous data This importance comes out of characteristics offered by these systems autonomy and dynamicity of peers decentralized control for scaling and transparent sharing large scale distributed resources The second edition of the International Conference on Data Management in Grid and P2P Systems was held during September 1 2 2009 in Linz Austria The main objective of this conference was to present the latest results in research and applications to identify new issues and to shape future directions Advances in Databases and Information Systems Yannis Manolopoulos, Goce Trajcevski, Margita Kon-Popovska, 2014-09-02 This book constitutes the thoroughly refereed proceedings of the 18th East European Conference on Advances in Databases and Information Systems ADBIS 2014 held in Ohrid Macedonia in September 2014 The 26 revised full papers presented together with one invited talk were carefully selected and reviewed from 82 submissions The papers are organized in topical

sections on data models and query languages data warehousing query and data flow optimization information extraction and integration spatial temporal and streaming data data mining and knowledge discovery data organization and physical issues and data and business processes **Public Key Infrastructure** Stig F. Brzozowska, Dagmara Bubel, Larysa Nekrasenko, 2022-06-09 This book highlights the essence of information technology in the modern digital world in relation to improvements and threats to organisations and e business in the era of the digital economy Rapid IT development has created modern business proposals such as digital and virtual currencies crowdfunding peer to peer lending mobile banking online investing and new payment systems This allows organisations and firms to increase competitiveness by using financial products and services thus increasing their value Information technology users receive significant timesaving and a choice of investment options At the same time there is a new challenge for regulators who must monitor how this or that technology affects the financial sector The authors have collected and systematised information on the models of using information technology in e business as well as issues of applying information technology in smart organisations and public institutions The book addresses the issues of risk management in organizations and the problems of personal and social risks resulting from the use of information technology In addition the book presents a review of e commerce sectors and models as well as e commerce tools international payment systems and modern money systems Risks threats and security rules for using banking services e commerce and payment systems are reviewed and systematised

Building Better Interfaces for Remote Autonomous Systems Jacob D. Oury, Frank E. Ritter, 2021-01-19 This Open Access SpringerBrief provides foundational knowledge for designing autonomous asynchronous systems and explains aspects of users relevant to designing for these systems introduces principles for user centered design and prepares readers for more advanced and specific readings It provides context and the implications for design choices made during the design and development of the complex systems that are part of operation centers As such each chapter includes principles to summarize the design implication that engineers can use to inform their own design of interfaces for operation centers and similar systems It includes example materials for the design of a fictitious system which are referenced in the book and can be duplicated and extended for real systems The design materials include a system overview the system architecture an example scenario a stakeholder analysis a task analysis a description of the system and interface technology and

contextualized design guidelines The guidelines can be specified because the user the task and the technology are well specified as an example Building Better Interfaces for Remote Autonomous Systems is for working system engineers who are designing interfaces used in high throughput high stake operation centers op centers or control rooms such as network operation centers NOCs Intended users will have a technical undergraduate degree e g computer science with little or no training in design human sciences or with human centered iterative design methods and practices Background research for the book was supplemented by interaction with the intended audience through a related project with L3Harris Technologies formerly Harris Corporation
