Telecommunications Engineer's

Reference Book Fraidoon Mazda, 2014-06-28 Telecommunications Engineer's Reference Book maintains a balance between developments and established technology in telecommunications. This book consists of four parts. Part 1 introduces mathematical techniques that are required for the analysis of telecommunication systems. The physical environment of telecommunications and basic principles such as the teletraffic theory, electromagnetic waves, optics, and ionosphere and troposphere, and signals and noise are described in Part 2. Part 3 covers the political and regulatory environment of the telecommunications industry, telecommunication standards, open system interconnect reference model, multiple access techniques, and network management. The last part deliberates telecommunication applications that includes synchronous digital hierarchy, asynchronous transfer mode, integrated services, digital network switching systems, centrex, and call management. This publication is intended for practicing engineers and as a supplementary text for undergraduate courses in telecommunications.

This comprehensive book offers chemists and chemical engineers detailed coverage of the full range of analytical methods, including all the conventional wet and instrumental techniques. It also provides information on the preliminary operations of analysis, preliminary separation methods, and statistics in chemical analysis, all essential in the application of any analytical method.

Contemporary Methods in Bioinformatics and Biomedicine and Their Applications Sotir S. Sotirov, Tania Pencheva, Janusz

Kacprzyk, Krassimir T. Atanasov, Evdokia Sotirova, Galya Staneva, 2022-03-11. This book gathers selected papers from the First International Symposium on Bioinformatics and Biomedicine. Issues related to medicine and health care constitute one of the grand challenges faced by mankind, and this naturally implies a growing interest in these problems among both researchers and scholars, politicians and policymakers, as well as economists. The present volume, which gathers selected papers from the First International Symposium on Bioinformatics and Biomedicine BioInfoMed 2020, is a recent response to this interest. In the subsequent sections and chapters, it covers a multitude of various topics related to bioinformatics, biomedicine, bioengineering, as well as a broadly perceived healthcare. Issues related to decision making in bioinformatics, biomedicine, and health care, mathematical modelling in biomedicine and health care, artificial intelligence in biomedicine and health care, uncertainty and imprecision, notably intuitionistic fuzzy sets with applications in bioinformatics and biomedicine, biomedical approaches and applications, biomedical imaging and image processing, and excitable structures and motor activity are covered.
