Tagging People Powered Metadata For The Social Web:

Tagging Gene Smith, 2007-12-27 Tagging is fast becoming one of the primary ways people organize and manage digital information. Tagging complements traditional organizational tools like folders and search on users' desktops as well as on the web. These developments mean that tagging has broad implications for information management, information architecture, and interface design. And its reach extends beyond these technical domains to our culture at large. We can imagine, for example, the scrapbookers of the future curating their digital photos, emails, ticket stubs, and other mementos with tags. This book explains the value of tagging, explores why people tag, how tagging works, and when it can be used to improve the user experience. It exposes tagging's superficial simplicity to reveal interesting issues related to usability, information architecture, online community, and collective intelligence.

Library and Information Sciences Chuanfu Chen, Ronald Larsen, 2014-09-30 This book explores the development trends and research of library and information sciences (LIS) in the digital age. Inside, readers will find research and case studies written by LIS experts, educators, and theorists, most of whom have visited China, delivered presentations there, and drafted their articles based on feedback they received. As a result, readers will discover the LIS issues and concerns that China and the international community have in common. The book first introduces the opportunities and challenges faced by the library and information literacy profession and discusses the key role of librarians in the future of information literacy education. Next, it covers trends in LIS education by examining the vision of the iSchool movement and detailing its practice in Syracuse University. The book then covers issues in information seeking and retrieval by showing how visual data mining technology can be used to detect the relationship and pattern between terms on the Q & A of a social media site. It also includes a case study regarding tracing information seeking behavior and usage on a multimedia website. Next, the book stresses the importance of building an academic accreditation framework for scientific datasets, explores the relationship between bibliometrics and university rankings, and details the birth and development of East Asian Libraries in North America. Overall, the book offers readers insight into the changing nature of LIS, including the electronic dissemination of information, the impact of the Internet on libraries, the changing responsibilities of library professionals, the new paradigm for evaluating information, and characteristics and functions of today's library personnel.

Web 2.0 and Social Networking for the Enterprise Joey Bernal, 2009-10-15 The Hands On Guide to Thriving with Web 2.0 and Social Networking. Deepen employee and coworker relationships, improve productivity, strengthen collaboration, and boost creativity. Embrace support and manage social networking so it works for you, not against you. Best practices and new case studies from IBM and many of its most innovative portal and social networking sites. This book provides hands-on start-to-finish guidance for business and IT decision makers who want to drive value from Web 2.0 and social networking technologies. IBM expert Joey Bernal systematically identifies business functions and innovations these technologies can enhance and presents best practice patterns for using them in both internal and external-facing applications.

Drawing on the immense experience of IBM and its customers Bernal addresses both the business and technical issues enterprises must manage to succeed He offers insights and case studies covering multiple technologies including AJAX REST Atom RSS enterprise taxonomies tagging folksonomies portals mashups blogs wikis and more He also presents practical guidance for building robust secure collaborative applications by using applications and services from multiple sources with powerful tools such as WebSphere Portal Lotus Connections and IBM Mashup Center

Folksonomies. Indexing and Retrieval in Web 2.0 Isabella Peters, 2009-12-23 In Web 2.0 users not only make heavy use of Collaborative Information Services in order to create publish and share digital information resources what is more they index and represent these resources via own keywords so called tags The sum of this user generated metadata of a Collaborative Information Service is also called Folksonomy In contrast to professionally created and highly structured metadata e.g. subject headings thesauri classification systems or ontologies which are applied in libraries corporate information architectures or commercial databases and which were developed according to defined standards tags can be freely chosen by users and attached to any information resource As one type of metadata Folksonomies provide access to information resources and serve users as retrieval tool in order to retrieve own resources as well as to find data of other users The book delivers insights into typical applications of Folksonomies especially within Collaborative Information Services and discusses the strengths and weaknesses of Folksonomies as tools of knowledge representation and information retrieval More over it aims at providing conceptual considerations for solving problems of Folksonomies and presents how established methods of knowledge representation and models of information retrieval can successfully be transferred to them

IFRS and XBRL Kurt Ramin, Cornelis Reiman, 2013-03-27 International Financial Reporting Standards are increasingly adopted worldwide and it is critical to understand their place within the global business environment as well as the most up to date methods of applying them In IFRS and XBRL Kurt Ramin and Cornelis Reiman world authorities on IFRS have condensed the overwhelming flood of available material to present a comprehensive guide to the key components of IFRS helping to explain why they are a priority for private enterprises and governments alike The book provides valuable commentary on key components of IFRS which are crucial to local national and international business decision making demonstrates the importance of disclosure checklists offers illustrative financial statements arising from IFRS looks at recent developments in IFRS in particular how the standards should be reflected in the narrative report and what implications they have for sustainability reporting explores how business reporting can be improved for example through the addition of non financial reporting examines the key issue of emerging technology in reporting under IFRS especially the use of XBRL and the obvious push for a new paradigm whereby object definitions tracking and valuation offer considerable benefits to the people who produce and rely upon business reports To complete the picture the authors examine other standards and cover important issues such as US GAAP convergence with IFRS and the importance of International Valuation Standards IFRS and XBRL is the complete guide
