Furstenberg,2009-07-15 Over the past few decades scholarly and policy interest in fatherhood and fathering has burgeoned in large part because of profound social changes in women s and men s lives in the last half of the twentieth century However this research has remained largely national in focus with little cross cultural dissemination of knowledge about fathering practices and supportive or constraining social policies This insightful volume presents a transatlantic perspective on fatherhood and fathering comparatively across nation states as well as in individual countries including the United States Canada United Kingdom and Norway Exploring the diversity of fatherhood it encompasses differences across social class race and ethnicity age and life course and varied household formations The articles examine young fathers separated and divorced fathers fathers from minority ethnic and immigrant groups working class fathers new fathers gay fathers and fathers of children with special needs Readers can gauge the different epochs of fathering over time and explore the tension that fathers may experience between being good financial

providers and actively caring for their children Authored by leading figures in fathering research from North America Europe and Scandinavia the multilayered and intriguing articles in this volume of The ANNALS point toward the need for sustainable policy frameworks that enable fathers to be involved in their children s lives in ways that do not include biased assumptions about the expression of that involvement **Editorial Research Reports, 1988** ,1988-09
