Handbook of Theory and Practice of Sustainable Development in Higher Education Walter Leal Filho, Constantina Skanavis, Arminda do Paço, Judy Rogers, Olga Kuznetsova, Paula Castro, 2016-11-23 This Handbook approaches sustainable development in higher education from an integrated perspective addressing the dearth of publications on the subject. It offers a unique overview of what universities around the world are doing to implement sustainable development i.e. via curriculum innovation, research activities or practical projects and how their efforts relate to education for sustainable development at the university level. The Handbook gathers a wealth of information, ideas, best practices and lessons learned in the context of executing concrete projects and assesses methodological approaches to integrating the topic of sustainable development in university curricula. Lastly, it documents and disseminates the veritable treasure trove of practical experience currently available on sustainability in higher education.

Transforming Higher Education Through Universal Design for Learning Seán Bracken, Katie Novak, 2019-02-21 Providing insight into the background theory and practical applications of Universal Design for Learning (UDL). *Transforming Higher Education through Universal Design for Learning: An International Perspective* examines and shares best practice in UDL implementation worldwide to provide strategies for strengthening student accessibility, engagement and learning outcomes through the development of flexible learning environments. Drawing upon insightful research-based contributions from educators and student service specialists in Australia, Belgium, Brazil, Canada, Ireland, Israel, Norway, South Africa, Spain, the UK and all across the USA, this book considers diversity in the form of disability, minority ethnic groups, gender identities, first-generation university students and varying socio-economic backgrounds. It brings together key thinkers and actors in the field of UDL and expertly maps its practices to the higher educational domain. It explores the multiple means of representation, expression and engagement that combine to create a successful UDL framework. Each chapter not only provides a different perspective of how UDL has helped meet the needs of all students to ensure that education is accessible, culturally responsive and socially just, but also considers how this can then be implemented into higher education environments worldwide. This book is a crucial read for those who want to make a positive difference in higher education provision and outcomes.

ICEL 2015-10th International Conference on e-Learning Dr Carlton Watson, 2015-06-12 These proceedings represent the work of researchers participating in the 10th International Conference on e-Learning (ICEL 2015) which is being hosted this year by the College of the Bahamas, Nassau, on the 25-26 June 2015. Intersections in Language Planning and Policy Jean Fornasiero, Sarah M. A. Reed, Rob Amery, Eric Bouvet, Kayoko Enomoto, Hui Ling Xu, 2020-09-28 This volume encompasses the range of issues encountered by language scholars who teach and research in departments of languages and cultures within the higher education system predominantly in Australia but touching other universities worldwide Related studies on language planning methodology or pedagogy have focused on one or more of these same issues but rarely on their totality Intersections as a metaphor running discreetly through the essays in this volume connects them all to a lived reality The field of languages and cultures as it is practised and reflected upon in Australian universities is essentially an interdisciplinary and interconnecting space one in which linguistic and disciplinary diversities meet and join forces rather than collide or disperse along different pathways The international and local studies featured here focus on language planning new pedagogies and language reclamation and link to meeting points and commonalities They show that language scholars are increasingly finding themselves on common ground as they tackle issues of policy and practice affecting their field whether within their institutions within the tertiary system or within the framework of government policy

Cloete, Nico, Bunting, Ian, 2018-11-09 From the early 2000s a new discourse emerged in Africa and the international donor community that higher education was important for development in Africa Within this zeitgeist of converging interests a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary This led to the establishment of the Higher Education Research and Advocacy Network in Africa Herana to concentrate on

research and advocacy about the possible role and contribution of universities to development in Africa This book is the final publication to emerge from the Herana project The project has also published more than 100 articles chapters reports manuals and datasets and many presentations have been delivered to share insights gained from the work done by Herana Given its prolific dissemination it seems reasonable to ask whether this fourth and final publication will offer the reader anything new This book is certainly different from previous publications in several respects First it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project Second previous books and reports were published mid project This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large scale project For the first time some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees Different does not necessarily mean new An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor funded project Rather each chapter in this book brings to a lesser or greater extent something new to our understanding of universities research and development in Africa

Open Access Implications for Sustainable Social, Political, and Economic Development Jain, Priti, Mnjama, Nathan, Oladokun, O., 2020-09-18

Open access publishing can be used as a strategic tool to avail access to information and achieve universal literacy. Open access has gained importance over the past 15 years by making knowledge available to all without any barrier of affordability or restrictions on using this knowledge to inform and develop. Open access contributes to scientific research excellence, disseminates research results to a wider community, and promotes multi-disciplinary and collaborative research. Issues of sustainable development and open access are major concerns in librarianship and information management, particularly as the international library and information management community is focusing on how to contribute to the Sustainable Development Goals. *Open Access Implications for Sustainable Social, Political, and Economic Development* is a pivotal reference source that provides an understanding of the concept of open access within the context of social, political, and economic development and deliberates the critical issues and challenges that face the implementation of open access and its impact on the global economy and sustainable development. While highlighting a broad range of topics including digital scholarship, open data, and ethics, this book is ideally designed for librarians, information science professionals, government officials, policymakers, academicians, researchers, and students.

Pub Rock in the UK and Australia Andy Bennett, Jon Stratton, 2025-11-19

This book critically examines two versions of the genre identified as pub rock as they evolved in the UK and Australia. Both developed in the communal spaces of pubs and both had their heyday in the mid to late 1970s. Indeed, the two have so much in common that AC/DC, sometimes thought of as the quintessential Australian pub rock group, became hugely popular in the UK, while other Australian groups such as the Sports Outliers of pub rock also had success there. At the same time, UK pub rockers like Graham Parker and the Rumour and Rockpile toured Australia. Three of Parker's albums climbed to higher places on the Australian chart than on the UK chart. However, a great deal separated the two genres. In the UK, pub rock is often misleadingly viewed as the insipid music which was violently replaced by the uproarious and rebellious punk sounds of Sex Pistols, the Clash, the Slits, and the other do it yourself groups of 1977 and later. Many members of groups later identified as punk, including Sex Pistols and the Clash, had previously played in groups identified as pub rock. In

Australia pub rock played by groups including Billy Thorpe and the Aztecs the Angels and Rose Tattoo formed the basis for the mainstream guitar rock sound that dominated Australian popular music through the 1980s and into the 1990s This book makes a valuable contribution to cultural sociology popular music and cultural studies *Reimagining Contract Law Pedagogy* Warren Swain,David Campbell,2019-01-14 Reimagining Contract Law Pedagogy examines why existing contract teaching pedagogy has remained in place for so long and argues for an overhaul of the way it is taught With contributions from a range of jurisdictions and types of university it provides a survey of contract law courses across the common law world reviewing current practice and expressing concern that the emphasis the current approach places on some features of contract doctrine fails to reflect reality The book engages with the major criticism of the standard contract course which is that it is too narrow and rarely engages with ordinary life or at least ordinary contracts and argues that students are left without vital knowledge This collection is designed to be a platform for sharing innovative teaching experiences with the aim of building a new approach that addresses such issues This book will have international appeal and will be of interest to academics researchers and postgraduates in the fields of law and education It will also appeal to teachers of contract law as well as governmental and legal profession policymakers **MOOCs Now** Susan W.
