Developing Core Literacy Proficiencies, Grade 7 Odell Education, 2016-08-08 The Developing Core Literacy Proficiencies program is an integrated set of English Language Arts Literacy units spanning grades 6-12 that provide student-centered instruction on a set of literacy proficiencies at the heart of the Common Core State Standards (CCSS). Reading Closely for Textual Details Making Evidence-Based Claims Making Evidence-Based Claims about Literary Technique Grades 9-12 Researching to Deepen Understanding Building Evidence-Based Arguments The program approaches literacy through the development of knowledge, literacy skills, and academic habits. Throughout the activities, students develop their literacy along these three paths in an integrated, engaging, and empowering way. Knowledge The texts and topics students encounter in the program have been carefully selected to expose them to rich and varied ideas and perspectives of cultural significance. These texts not only equip students with key ideas for participating knowledgeably in the important discussions of our time but also contain the complexity of expression necessary for developing college- and career-ready literacy skills. Literacy Skills The program articulates and targets instruction and assessment on twenty CCSS-aligned literacy skills ranging from making inferences to reflecting critically. Students focus on this set of twenty skills throughout the year, and the program continually applies them in new and more sophisticated ways. Academic Habits The program articulates twelve academic habits for students to develop, apply, and extend as they progress through the sequence of instruction. Instructional notes allow teachers to introduce and discuss academic habits such as preparing and completing tasks that are essential to students' success in the classroom. The program materials include a comprehensive set of instructional sequences, teacher notes, handouts, assessments, rubrics, and graphic organizers designed to support students with a diversity of educational experiences and needs. The integrated assessment system centered around the literacy skills and academic habits allows for the coherent evaluation of student literacy development over the course of the year and vertically across all grade levels. *Focus on Writing Composition - Teacher's Resource for Starter and Introductory Books* Louis Fidge, 1999 The supporting Teacher Resource Books offer practical advice on organizing and using the course and provide a comprehensive range of further teaching ideas that cover all links with the NLS. Beginning Writers in the Zone of Proximal Development Elizabeth Petrick-Steward, 2012-10-12 How do young children bridge the gap between writing a story with pictures and writing with words? How children learn to use written words to tell a story is a topic important to both cognitive development and early literacy instruction. Using the theoretical framework developed by Vygotsky, the behavior of a group of prekindergarten children as they author two consecutive pieces of writing is analyzed. The children tell their stories at first with spoken words and pictures. As they discuss their work in progress in public conferences, they discover how to build on and combine existing skills to produce a new skill: telling stories with written words. Current descriptive and theoretical perspectives on beginning writing are presented in this volume with a particular focus on Vygotsky's concept of the zone of proximal development. a

period of sensitivity in which learning advances The proposed mechanism of change is verbal mediation talk among peers and teachers as they discuss work in progress which moves the children through the zone of proximal development An open whole language approach to literacy instruction makes the classroom in this book an ideal arena in which to observe verbal mediation in operation Children are free to question criticize and argue and in the process they collectively advance their developing ability to use written language The work is unique in that the rich and comprehensive data record is reproduced in its entirety More than 400 illustrations of the children's products two books apiece pictured before and after the children's revisions are included along with transcripts of the conferences about each of the pages permitting direct observation of the effects of verbal mediation This dynamic study documents change during a period of time when specific learning is occurring and provides strong support for the value and power of Vygotsky's theoretical framework
