within a viewpoint which assumes limited attentional capacities and accounts for second language speaking based on Levelt's model of first language speaking. Six empirical chapters present original studies. They explore the topics of task planning, familiarity of information in a task, task repetition, task characteristics and the effects of using post task transcription. The studies interweave with and build upon each other reflecting their conjoint focus on how second language learning, memory and attention limitations shape their performance in using the target language. In the concluding chapter the accumulated findings across these studies are discussed in terms of the nature of preparation for a task, the role of task structure, the respective claims of the Tradeoff and Cognition Hypotheses, the role of selective attention and the implications of the studies for pedagogy. The book is a central reference for students in psycholinguistics, second language acquisition and task based language teaching.

Task-based Language Learning and Teaching Rod Ellis, 2003-04-03 This book explores the relationship between research, teaching and tasks and seeks to clarify the issues raised by recent work in this field. The author brings an accessible style and broad scope to an area of contemporary importance to both SLA and language pedagogy.

ESL Standards for Pre-K-12 Students Teachers of English to Speakers of Other Languages, 1997 The guide outlines performance standards for each of three broad goals of English as a Second Language teaching in elementary and secondary education. The three goals include use of English to communicate in social settings, use of English to achieve academically in all content areas and use of English in socially and culturally appropriate ways. Within each of these three goals, three more specific performance standards are enumerated. An introductory section explains the rationale, origins and use of these standards. Subsequent sections, one for each grade group (pre-K, 3, 4, 8, 9, 12), detail appropriate descriptors and progress indicators for each standard for students at that level. In addition, a brief vignette illustrates their use in the classroom and some further discussion follows. A glossary is included and supporting documentation is appended. Contains 57 references.
