Gupta, Amod Gupta, Mangat R. Dogra, 2004-11-12 The emergence of Optical Coherence Tomography OCT in recent years has revolutionized the way we see the retina Providing in real time high resolution cross sectional images of the macula that are very similar to obtaining in vivo histopathological specimens OCT represents a major advance in the diagnostics of retinal disease The excitement of working with this new tool has been dampened by the non availability of any standard textbook on the subject and meant that every new finding on the OCT saw us rushing to the library almost on a daily basis to locate any published reports on the subject Until now Containing nearly 900 scans of both normal and diseased appearances most in full color Atlas of Optical Coherence Tomography of Macular Diseases covers how to use Stratus OCT for diagnosing various macular disorders identifying correct therapeutic approaches and monitoring the responses to therapies and interventions The authors provide brief case summaries fundus photographs fluorescein angiography and the OCT images and the follow up images They discuss OCT applications for diagnosis management and follow up in diabetic macular edema macular hole taut posterior hyaloid membrane vitreofoveal traction idiopathic central serous chorioretinoplasty submacular pathology and more **Optical Coherence Tomography** Samuel Boyd, Rosario Brancato, Bradley Straatsma, 2011-04 Optical Coherence Tomography Atlas and Text covers the multiple uses and interpretation of OCT and its various applications in ophthalmology related to the posterior segment and the retina The book presents the diagnosis and management of glaucoma age related

OCT Imaging in Glaucoma Ki Ho Park, Tae-Woo Kim, 2021-05-31 This book provides readers with the most up to date practical information on optical coherence tomography OCT imaging in glaucoma A key aim is to demonstrate how imaging results are interpreted and applied in clinical practice To this end many high quality images are presented to document findings in patients with glaucoma glaucoma suspects and healthy subjects and to explain their clinical significance The book is timely in that the role of OCT in the early diagnosis of glaucoma the detection of disease progression and the choice of management options has been advancing rapidly OCT based exploration of the segmented layer of the neural tissue and the deeper structures of the optic nerve as well as OCT evaluation of the vascular network around the optic nerve head facilitates understanding and assessment of the risk of glaucomatous damage In explaining all aspects of the use of OCT in glaucoma this book will be a rich source of information and guidance for practicing ophthalmologists glaucoma specialists and trainees

Image Processing in Optical Coherence Tomography Using Matlab Robert Koprowski, Zygmunt Wróbel, 2011 This book covers the results of the creation of methods for ophthalmologists support in OCT images automated analysis These methods like the application developed on their basis are used during routine examinations carried out in hospital The monograph comprises proposals of new and also of known algorithms modified by authors for image analysis and processing presented on the basis of example of Matlab environment with Image Processing tools The results are not only obtained fully automatically but also repeatable providing doctors with quantitative information on the degree of pathology occurring in the patient In this case the anterior and posterior eye segment is analysed e g the measurement of the filtration angle or individual layers thickness To introduce the Readers to subtleties related to the implementation of selected fragments of algorithms the notation of some of them in the Matlab environment has been given The presented source code is shown only in the form of example of implementable selected algorithm In no way we impose here the method of resolution on the Reader and we only provide the confirmation of a possibility of its practical implementation

Glaucoma Diagnosis Structure and Function Robert N. Weinreb, Erik L. Greve, 2004 To the best of our knowledge the 1st Global AIGS Consensus Meeting on Structure and Function in the Management of Glaucoma was also the first global consensus meeting in ophthalmology The goal was to reach an evidence based consensus for both clinical practice and research through the use of information obtained from peer reviewed literature describing functional and structural diagnostic testing in glaucoma The faculty and review group consisted of leading global authorities on glaucoma diagnostic testing The preparation for the Consensus was unique in its format see page xii Repor

Glaucoma Franz Grehn, Robert Stamper, 2012-12-06 Essentials in Ophthalmology is a new review series covering all of ophthalmology categorized in eight subspecialties It will be published quarterly thus each subspecialty will be reviewed biannually Given the multiplicity of medical publications already available why is a new series needed Consider that the half life of medical

knowledge is estimated to be around 5 years Moreover it can be as long as 8 years between the first description of a medical innovation in a peer reviewed scientific journal and publication in a medical textbook A series that narrows this time span between journal and textbook would provide a more rapid and efficient transfer of medical knowledge into clinical practice and enhance care of our patients *Optical Coherence Tomography* G., Coscas,A., Loewenstein,F., Bandello,2014-03-18

Because of its many advantages optical coherence tomography OCT has revolutionized the way in which retinal diseases are screened and managed and how treatments are monitored In this volume the latest developments and findings are presented by experts in their respective fields After a short introduction covering the available equipment and the basic techniques the imaging features of various pathological findings in retinal diseases are presented The topics cover the outer layers including new modalities for choroid imaging out layer diseases such as the various types of macular degeneration retinal diseases such as diabetic retinopathy and vascular occlusion and retina and vitreous interface pathologies The final chapters are dedicated to the practicality of using OCT for the pre and postsurgical evaluation of the posterior segment and for the differential diagnosis of vitreoretinal diseases as well as in the management of patients with retinal and neuro ophthalmological diseases Making the essentials of the recently held ESASO course on OCT available in one volume this publication is a must read for experienced as well as trainee ophthalmologists who need to use OCT in their daily practice
