Weapons Acquisition: DoD Should Strengthen Policies for Assessing Technical Data Needs to Support Weapon Systems ,2006 Army and the Air Force have encountered limitations in their sustainment plans for some fielded weapon systems because they lacked needed technical data rights The lack of technical data rights has limited the services flexibility to make changes to sustainment plans that are aimed at achieving cost savings and meeting legislative requirements regarding depot maintenance capabilities During our review we identified seven Army and Air Force weapon system programs where these military services encountered limitations in implementing revisions to sustainment plans C 17 aircraft F 22 aircraft C 130J aircraft Up armored High Mobility Multipurpose Wheeled Vehicle HMMWV Stryker family of vehicles Airborne Warning and Control System AWACS aircraft and M4 carbine Although the circumstances surrounding each case were unique earlier decisions made on technical data rights during system acquisition were cited as a primary reason for the limitations subsequently encountered As a result of the limitations encountered due to the lack of technical data rights the services had to alter their

plans for developing maintenance capability at public depots new sources of supply to increase production or competitive offers for the acquisition of spare parts and components to reduce sustainment costs For example the Air Force identified a need to develop a capability to perform maintenance on the C 17 at government depots but lacked the requisite technical data rights Consequently the Air Force is seeking to form partnerships with C 17 subvendors to develop its depot maintenance capability Its efforts to form these partnerships have had mixed results according to Air Force officials because some sub vendors have declined to provide the needed technical data

Alexander,2007-04-01 Twenty second century historians will note that a new World War began on 9 11 2001 In reality it began much earlier Competing value systems and the lust for natural resources will precipitate an inevitable clash of civilizations Currently we face elusive foes foes who play by other rules and in fact we are already engaged in brutal truly asymmetric conflict with varied forms of fighting terrorism is but an isolated part The increasing number of polymorphic hostilities requires revolutionary and unconventional responses Special operations are the norm Nanoscale biological and digital technologies have transformed how we fight future wars Tactical lasers that zap pinpoint targets at twenty kilometers are being developed as is the millimeter wave Active Denial System that causes intense pain to those exposed The Mother of all Bombs has been dropped as have thermobaric weapons that destroy caves and bunkers Robots roam the battlefield while exotic sensors catalogue nearly every facet of our lives Paralyzing electrical shock weapons are in the hands of police Even phasers on stun are closer than you think *Winning the War* details the technologies and concepts necessary to ultimately determine the outcome of this global conflict Via realistic scenarios from recovering tourists kidnapped by terrorists to bringing down drug cartels in the Amazon and even preventing Armageddon in the Middle East *Winning the War* provides an insider s view into how these futuristic weapons will be used and into the complexities of modern warfare Bold and controversial measures are prescribed including the essential nature of absolute domination of space *Winning the War* makes clear that drastic and innovative actions will be necessary to ensure our national survival *The Army after Next* Thomas K. Adams,2006-10-30 This book recounts the successes and failures of the US Army s Army Transformation program in the larger context of the Department of Defense s overall military transformation effort Spurred by the belief that RMA represented the future the Department of Defense DoD set out to transform the U S armed forces by adopting RMA concepts Led by President George W Bush and Defense Secretary Donald Rumsfeld the DoD spent billions in an attempt to make the hypothetical capabilities real changing the entire structure of the

armed forces as a result The services the media Congress and the military industry each had its own agenda all of which continue to come into play in the development of RMA strategies The interplay of politics technology and military reality offers a fascinating narrative Sure to be found controversial by some compelling by all this is the only available book length examination of the way the U S Army and Department of Defense have tried to create the capabilities promised by the high tech Revolution in Military Affairs Of more immediate concern it is also the only in depth account of the effect RMA and transformation concepts had on the American operations in Afghanistan and Iraq Many of the problems in both Iraq and Afghanistan author Thomas K Adams argues arose from the DoD s implacable desire to implement RMA driven transformation concepts whether they were appropriate or not What we need to do he maintains is to fight the war we have not the war we want *List of Motor Vehicle Registrations and Licenses ,1917*
