Strait, 2015-12-01 When considering inequality one goal for educators is to enhance critical engagement to allow learners an opportunity to participate in an inquiry process that advances democracy Service learning pedagogy offers an opportunity to advance engaged learning opportunities within higher education This is particularly important given the power dynamics that are endemic within conversations about education including the conversations around the Common Core charter schools and the privatization of education Critical inquiry is central to the ethos of service learning pedagogy a pedagogy that is built upon community partner participation and active reflection Within higher education service learning offers an important opportunity to enhance practice within the community allowing students to engage stakeholders and youth which is particularly important given the dramatic inequalities that are endemic in today's society [Class Struggle and the Color Line](#) Paul Heideman, 2018-04-06 As Black oppression moves again to the forefront of American public life the history of radical approaches to combating racism has acquired renewed relevance Collecting for the first time source materials from a diverse array of writers and organizers this reader provides a new perspective on the complex history of revolutionary debates about

fighting anti Black racism Contextual material from the editor places each contribution in its historical and political setting making this volume ideal for both scholars and activists Paul Heideman s book reconstructs for us the long flowering of anti racist thought and organizing on the American Left and the central role played by Black Socialists in advancing a theory and practice of human liberation Class struggle and anti racism are two sides of the same coin in this powerful collection At a time when the emancipation of oppressed and working class people remain goals of progressives everywhere Heideman s book provides us a map to a past that can help us get free Bill V Mullen Professor of American Studies Purdue University Should white workers pursue racial supremacy to make America great again Ignore race by practicing color blindness and dwelling on labor and economic issues alone Or challenge oppression bigotry and exploitation in all their forms wherever and whenever they appear These strategies may sound like ones from our own time but they were live options for the left a century ago We are all in Paul Heideman s debt for compiling Class Struggle and the Color Line a set of rare original sources that remind us of this In the absence of sound social theory disgusting racism can be passed off as populist rebellion Don t let it happen again Christopher Phelps co author Radicals in America The U S Left since the Second World War Paul Heideman is a PhD student in Sociology at New York University and is a frequent contributor to Jacobin and the Historical Materialism Conference

Radical Constructivism in Mathematics Education E. Glasersfeld,2006-04-11 Mathematics is the science of acts without things and through this of things one can define by acts 1 Paul Val ry The essays collected in this volume form a mosaik of theory research and practice directed at the task of spreading mathematical knowledge They address questions raised by the recurrent observation that all too frequently the present ways and means of teaching mathematics generate in the student a lasting aversion against numbers rather than an understanding of the useful and sometimes enchanting things one can do with them Parents teachers and researchers in the field of education are well aware of this dismal situation but their views about what causes the wide spread failure and what steps should be taken to correct it have so far not come anywhere near a practicable consensus The authors of the chapters in this book have all had extensive experience in teaching as well as in educational research They approach the problems they have isolated from their own individual perspectives Yet they share both an overall goal and a specific fundamental conviction that characterized the efforts about which they write here The common goal is to find a better way to teach mathematics The common conviction is that knowledge cannot simply be transferred ready made from parent to child or from teacher to student but has to be actively built up by each learner in his or her own mind **CA Te Am Anthem 2007 Mod** Holt Rinehart & Winston,2007
