Chapter 13: Stress and Health

Definition of stressors, stress, chronic stress, perceived control and examples

- **Stressors:** specific events or chronic pressures that place demands on a person or threaten the person's well-being
 - Can be good, but also out of bad things
 - The "thing" (ex: exams, getting a job, where you're going to live)
 - Isn't going to give the same stress to everyone
- **Stress:** the physical and psychological response to internal or external stressors
 - The reaction to the "thing"
 - How you handle stressors, how you deal with
 - People react differently to different stressors, everyone interprets differently
- **Chronic stressors:** sources of stress that occur continuously or repeatedly
 - Health problems, bad relationships, etc.
 - Effects can accumulate and be long-lasting.
 - Chronic stressors have been shown to be linked to environments through environmental psychology.
- **Perceived controls**
 - Stressors challenge you to do something about it – having lack of control over the situation can add to the stress.
 - Studies show that perceived control over stressful events can be related to more effective coping

Books in Print Supplement, 1982 Team-Based Learning for Health Professions Education Larry K. Michaelsen, Dean X. Parmelee, Ruth E. Levine, Kathryn K. McMahon, 2023-07-03 Education in the health professions is placing greater emphasis on active learning, learning that requires applying knowledge to authentic problems and that teaches students to engage in the kind of collaboration that is expected in today's clinical practice. Team Based Learning (TBL) is a strategy that accomplishes these goals. It transforms passive lecture based coursework into an environment that promotes more self directed learning and teamwork and makes the classroom come alive. This book is an introduction to TBL for health profession educators. It outlines the theory, structure and process of TBL, explains how TBL promotes problem solving and critical thinking skills, aligns with the goals of science and health courses, improves knowledge retention and application and develops students as professional practitioners. The book provides readers with models and guidance on everything they need to know about team formation and maintenance, peer feedback and evaluation processes and facilitation and includes a directory of tools and resources. The book includes chapters in which instructors describe how they apply TBL in their courses. The examples range across undergraduate science courses, basic and clinical sciences courses in medical, sports, medicine and nursing education, residencies and graduate nursing programs. The book concludes with a review and critique of the current scholarship on TBL in the health professions and charts the needs for future research. **The Comprehensive Respiratory Therapist Exam**
