Structural Change in the World Economy Allan Webster, John H. Dunning, 1989 **Structural Change in the World Economy** Allan Webster, John H. Dunning, 1989 **The Distorted World of Soviet-Type Economies (Routledge Revivals)** Jan Winiecki, 2013-08-16 The Soviet Union and Eastern Europe provide unique examples of large scale relatively highly developed centrally planned economies. In the 1980s economists in both the East and West began to focus with increasingly critical attention on the economies of the Soviet Bloc in an attempt to explain why they were performing so poorly in comparison with the economies of the Western powers and the capitalist countries of South East Asia. First published in 1988, this substantial and innovative contribution to the critical literature on the economies of the former Soviet bloc is unusual in that its author is equally familiar with both Western and Eastern sources. It highlights in particular a discrepancy between the behaviour of individuals in Soviet style economies and that expected of agents in a market system. It proceeds to outline how the consequent discordance between microeconomic practice and macroeconomic planning generates fundamental economic distortions.

Economic Prospects - East and West Jan Winiecki, 2013-01-11 First published in 1987, this is an analysis of the contemporary breakdown of political and economic systems within the Eastern European communist countries. Rather than passively following the developments of this crisis, the author seeks instead to identify the reasons for failure and to examine alternative policies that offer solutions to these problems. Jan Winiecki's work offers a comparative study of the Soviet type economies of the East with the market economies of the West, providing a cause and effect analysis of each model with possible scenarios for their future prospects.

and which protected the interests of the Malay aristocrat classes and by extension the Malay masses in order to compensate for European economic dominance and the influx of a non Malay labour force Overall the book demonstrates that the South Indians a class whose identity social existence and prospects were inextricably linked to imperial processes benefitted from colonialism and should be viewed as an active transnational entity within a constructive system rather than as passive victims of repressive destructive forces
