

Student Exploration: Cell Types

Directions: Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes. **Make sure to use complete sentences and NO pronouns.**

Gizmo Warm-up

In the *Cell Types* Gizmo, you will use a light microscope to compare and contrast different samples. On the LANDSCAPE tab, click on the ***Eiodea* leaf**. (Turn on **Show all samples** if you can't find it.) Switch to the **MICROSCOPE** tab to observe the sample as it would appear under the microscope. By default, this microscope is using 40x magnification.

1. Drag the **Coarse focus slider** until the sample is focused as well as possible. Then, improve the focus with the **Fine focus slider**. What do you see?

Within the sample there are many different green boxes visible.

2. Select the 400x magnification. If necessary, adjust the fine focus. Now, what do you see?

There are many cells containing all the components of a plant cell.

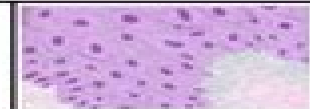

The individual chambers you see are **cells**, the smallest functional unit of an organism.

Activity A: Observing cells

Get the Gizmo ready:

- On the LANDSCAPE tab, click on the woman's right arm to choose the **Human skin** sample.
- Select the **MICROSCOPE** tab.

Introduction: Complex organisms are made up of smaller units, called cells. Most cells are too small to be seen by the naked eye. Microscopes are used to magnify small objects, so here you will use a **compound light microscope** to observe the cells of different organisms.

Proceed to the next page and complete the Gizmo to explore the answer to the question.

1. **Match:** Read about each microscope part. Match the description to the part on the diagram.

Cell Biology and Cancer Videodiscovery, Inc, 1999 Contains a supplemental science program designed to introduce students to major concepts related to the development and impact of cancer as well as explore the relationship between basic biomedical research and personal and public health Learning, Education & Games, Volume 3: 100 Games to Use in the Classroom & Beyond Karen Schrier, 2019-11-14 Have you ever wanted to know which games to use in your classroom library or afterschool program or even at home Which games can help teach preschoolers K 12 college students or adults What can you use for science literature or critical thinking skills This book explores 100 different games and how educators have used the games to teach what worked and didn't work and their tips and techniques The list of 100 goes from A to Z Safari to Zoombinis and includes popular games like Fortnite Call of Duty Modern Warfare and Minecraft as well as PC mobile VR AR card and board games *The Software Encyclopedia 2001*, 2001 *A Plague on Both Your Houses* Jennifer Michelle Sosnowski, 2004 *Crystals and Crystal Structures* Richard J. D. Tilley, 2006-08-14 Crystals and Crystal Structures is an introductory text for students and others who need to understand the subject without necessarily becoming crystallographers Using the book will enable students to read scientific papers and articles describing a crystal structure or use crystallographic databases with confidence and understanding Reflecting the interdisciplinary nature of the subject the book includes a variety of applications as diverse as the relationship between physical properties and symmetry and molecular and protein crystallography As well as covering the basics the book contains an introduction to areas of crystallography such as modulated structures and quasicrystals and protein crystallography which are the subject of important and active research A non mathematical introduction to the key elements of the subject Contains numerous applications across a variety of disciplines Includes a range of problems and exercises Clear direct writing style the book contains a wealth of information and it fulfills its purpose of providing an interesting and broad introduction to the terpenes CHEMISTRY WORLD February 2007 **One Plus One Equals One** John Archibald, 2014-06-26 We are in the midst of a revolution It is a scientific revolution built upon the tools of molecular biology with which we probe and prod the living world in ways unimaginable a few decades ago Need to track a bacterium at the root of a hospital outbreak No problem the offending germ's complete genetic profile can be obtained in 24 hours We insert human DNA into E coli bacteria to produce our insulin It is natural to look at biotechnology in the 21st century with a mix of wonder and fear But biotechnology is not as unnatural as one might think All living organisms use the same molecular processes to replicate their genetic material and the same basic code to read their genes The similarities can be seen in their DNA Here John Archibald shows how evolution has been plugging and playing with the subcellular components of life from the very beginning and continues to do so today For evidence we need look no further than the inner workings of our own cells Molecular biology has allowed us to gaze back more than three billion years revealing the microbial mergers and acquisitions that underpin the development of complex life One Plus One

Equals One tells the story of how we have come to this realization and its implications *Science Teaching and the Development of Thinking* Anton E. Lawson, 1995 To provide future science teachers with the methods and tools to present science this text integrates new methods and theories with more traditional existing programs to meet the needs of almost every instructor It encourages personal development of critical thinking skills in students as well as professional development for the future teacher by encouraging establishment of curriculum guidelines The text also stresses an active learning environment by utilizing learning cycles and in depth science investigation activities *Difference Maker* Christian Moore-Anderson, 2024-08-09 Rarely have I been so convinced by the power of a new theoretical underpinning for a pedagogical technique such as the one presented here Helen Darlington Faculty Progress Leader for Science at South Wirral High School reviewed in School Science Review From the author of *Biology Made Real* *Difference Maker* reveals how to teach with students rather than merely teach to them Without slides or worksheets it shows how to provoke understanding through diagrams and dialogue bringing forth a distinct teaching approach Inside you ll find The recursive teaching model An evidence and theory inspired model for co constructing meaning with students rather than just telling them or having them discover alone Detailed examples of real lessons The exact diagrams I ve drawn in lessons and how I ve built them step by step with students Plus the questions I ve asked at what point in the lesson and why A theory informed how to guide for planning explanations How to explain biological concepts by applying the variation theory of learning and enactive cognitive science The resulting heuristic cuts planning time while vastly improving students understanding A theory informed how to guide for adaptive teaching Adapting is essential in the moment as you never know how students will interpret a new explanation With an original model for productive conversation I unveil the types of questions that generate understanding and rich feedback for the teacher These looping conversations trigger a coordinated co regulation between teacher and students ensuring mutual understanding before moving forward A theory informed how to guide for co constructing stock and flow diagrams There are several benefits 1 building these models clarifies your understanding to yourself and your students and 2 teaching becomes more conceptual conversational adaptive and enjoyable I show how to read design and teach with them through detailed lesson examples Plus an appendix of 37 diagrams I ve used with my classes A new model of curricular content metacontent The curriculum is not just a list of content of equal weight There are fundamental ideas that give meaning to the rest of the curriculum By including this metacontent in teaching a shared way of seeing and talking about our subjects emerges The first type of metacontent I explain is a set of principles that I share with students and discuss during every topic These unifying principles avoid the feeling that biology is just a lot of facts to learn The second type is understanding understanding itself I share a taxonomy of understanding that allows students to grasp what I expect of them in every topic I provide example sentences for each level of understanding questions I ve asked to test my students understanding and answers my students have given A way of seeing and being Rather than a training manual with activities
